Democratizing Higher Education Patrick Blessinger 2015-03-12 Higher education systems around the world are undergoing fundamental change and reform due to external pressures—including internationalization of higher education, increased international competition for students, less reliance on public funding, and calls to create greater access opportunities for citizens. How are higher education systems evolving structurally as a result of these and other

pressures? In light of these changes, how can higher education be a positive force for democratizing societies? This book examines the emerging trends taking place in higher education systems around the world, focusing on the most salient political and social forces that underlie these trends. Each chapter provides a case study of a country, exploring its cultural and political history, the political and social developments that have affected its higher education system, and the result of these changes on the higher education system. In a fast-changing, knowledge-intensive, democratic society, *Democratizing Higher Education* explores how higher education systems can be developed to provide access, affordability, participation, and quality life-long learning for all.

The Pigman, by Paul Zindel Gloria Levine 2000 Activities to be used in the classroom to accompany the reading of *The pigman* by Paul Zindel. **Enlightened Literacy Beyond the Reading Wars** Dr. Deborah Duncan Owens 2025-05-29 *Enlightened Literacy Beyond the Reading Wars: Providing Hope for Democracy, Global Citizenship, and the Human Condition* provides an in-depth historical analysis of the reading wars that have dominated the policy discussions and governmental mandates about how reading is taught in public schools across the United States for decades. The resulting fixation on phonics, and criticism of public schools continues to drive headlines in spite of what is considered settled science about the essentiality of phonics in early reading instruction. Deborah Duncan Owens' journey to develop a new paradigm for literacy instruction through enlightened literacy provides insight into the convergence of the economic and governmental forces that have resulted in the stagnation of literacy research and practice and the reductionist view of reading instruction that threatens literacy development in the United States. *Enlightened Literacy* offers an alternative framework that holds the promise of moving beyond the reading wars toward a more expansive vision for literacy education. Actualizing enlightened literacy in the classroom environment is examined through four aspects: 1) a panoramic perspective; 2) a humanistic ethos; 3) a spirit of curiosity; and 4) a focus on the pragmatic.
