Rethinking Christ and Culture Craig A. Carter 2007-01-01 In 1951, theologian H. Richard Niebuhr published *Christ and Culture*, a hugely influential book that set the agenda for the church and cultural engagement for the next several decades. But Niebuhr's model was devised in and for a predominantly Christian

cultural setting. How do we best understand the church and its writers in a world that is less and less Christian? Craig Carter critiques Niebuhr's still pervasive models and proposes a typology better suited to mission after Christendom.

Your Library Is the Answer Christina T. Russo 2015-01-22 Today's tech-savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st-century tools and know-how necessary for educators to appeal to and challenge students to learn—and to want to learn. What are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire for socialization and constant communication—attributes of their lives outside of education—via the integration of cutting-edge technologies and "new media" in the library or classroom serve to ignite creativity, curiosity, and critical thinking? This book shows how you can make use of non-traditional tools such as popular social networks, collaborative technologies, and cloud computing to teach information and communications technologies integrated with the school curriculum to improve student learning—and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides an easy-to-follow blueprint for using collaborative techniques, innovation, and teaching for creativity to achieve the new learning paradigm of self-directed learning, such as flipping the classroom or library. Readers of this book will find concrete, step-by-step examples of proven lesson plans, collaborative models, and time-saving strategies for the successful integration of American Association of School Librarians (AASL) standards. The authors—both award-winning teachers—explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction, showing that they both enhance student learning outcomes and provide data for measuring their impact on learning.

Incomplete Project of Schizoanalysis Ian Buchanan 2021-06-30 In these 20 essays written over a 20-year period, Buchanan shines a light on the experimental nature of the work of Deleuze and Guattari. He shows it to be constitutively incomplete as their project was an attempt to understand our contemporary situation which is constantly changing and can therefore never be understood in a complete way. Clustered around five main themes - Method, Film, Space, Analysis and Assemblages - Buchanan's book will appeal to experts as well as those new to Deleuze and Guattari working across literary criticism, film studies, cultural studies, political theory and philosophy.

Who Do You Want to Be When You Grow Old? Richard J. Leider 2021-07-13 "[A] valuable guide . . . The authors' gentle tone and many helpful suggestions will make readers feel as if they are listening to a close friend." —

Publishers Weekly This is a book about how to grow old—with the emphasis on "grow." The path of purposeful aging is accessible to all—and it's fundamental to health, happiness, and longevity. In their bestseller *Repacking Your Bags*, Richard J. Leider and David A. Shapiro defined the good life as living in the place you belong, with people you love, doing the right work, on purpose. This book builds on that definition to offer a purposeful path for living well while aging well. With a focus on developing and deepening a sense of purpose in later life, *Who Do You Want to Be When You Grow Old?* celebrates the experience of aging with inspiring stories, real-world practices, and provocative questions. Framed by a long conversation between two old friends, the book reconceives aging as a liberating experience that enables us to become more authentically the person we always meant to be with each passing year. "In a culture that offers little guidance for growing old, but excels at pushing elders aside, here's a book that will help us age into the fullness of life." —Parker J. Palmer, author of *On the Brink of Everything*

Encyclopedia of the Anthropocene 2017-11-27 *Encyclopedia of the Anthropocene, Five Volume Set* presents a currency-based, global synthesis cataloguing the impact of humanity's global ecological footprint. Covering a multitude of aspects related to Climate Change, Biodiversity, Contaminants, Geological, Energy and Ethics, leading scientists provide foundational essays that enable researchers to define and scrutinize information, ideas, relationships, meanings and ideas within the Anthropocene concept.

Questions widely debated among scientists,

humanists, conservationists, politicians and others are included, providing discussion on when the Anthropocene began, what to call it, whether it should be considered an official geological epoch, whether it can be contained in time, and how it will affect future generations. Although the idea that humanity has driven the planet into a new geological epoch has been around since the dawn of the 20th century, the term 'Anthropocene' was only first used by ecologist Eugene Stoermer in the 1980s, and hence popularized in its current meaning by atmospheric chemist Paul Crutzen in 2000. Presents comprehensive and systematic coverage of topics related to the Anthropocene, with a focus on the Geosciences and Environmental science Includes point-counterpoint articles debating key aspects of the Anthropocene, giving users an even-handed navigation of this complex area Provides historic, seminal papers and essays from leading scientists and philosophers who demonstrate changes in the Anthropocene concept over time
