Start with a Story Clyde Freeman Herreid 2007 Kipp Herreid learned other ways to teach- much better ways. His favorite approach puts science in vivid context through case studies, which he calls "stories with an educational message." This compilation of 40-plus essays examines every aspect of the case study method.--[back cover].

Computer Assisted Learning P. R. Smith 2014-06-28 Provides an important international forum for those interested in the theory and practice of computer-assisted learning in education and training. The papers are grouped under 4 main themes: hardware interaction with CAL; fundamental aspects of CAL; experimental studies in CAL; and developments and future directions

The Family J. Ross Eshleman 2003 This best-selling text introduces key theoretical perspectives on families, reflects the most current data and research, and uses cross-cultural comparisons to present the most comprehensive coverage of the family.

Biological Science Freeman 2002-03 By Warren Burggren, University of North Texas; Jay Brewster, Pepperdine University; Laurel Hester, South Carolina Governor's School for Science and Mathematics. Rather than repeat what is covered in the textbook, the Student Study Guide will help students study biology and think like a scientist. Introductory chapters on Data Interpretation, Looking for Relationships, Experimentation and Writing will be illustrated and developed for the student. Each text chapter will then be covered with the goal of reinforcing the ideas mentioned in introductory chapters and to tie them to appropriate topics within a chapter.

Molecular Biology of the Cell 2002 MBC online publishes papers that describe and interpret results of original research concerning the molecular aspects of cell structure and function.

Team-Based Learning Larry K. Michaelsen 2023-07-03 This book describes team-based learning (TBL), an unusually powerful and versatile teaching strategy that enables teachers to take small group learning to a whole new level of effectiveness. It is the only pedagogical use of small groups that is based on a recognition of the critical difference between "groups" and "teams", and intentionally employs specific procedures to transform newly-formed groups into high performance learning teams. This book is a complete guide to implementing TBL in a way that will promote the deep learning all teachers strive for. This is a teaching strategy that promotes critical thinking, collaboration, mastery of discipline knowledge, and the ability to apply it. Part I covers the basics, beginning with an analysis of the relative merits and

limitations of small groups and teams. It then sets out the processes, with much practical advice, for transforming small groups into cohesive teams, for creating effective assignments and thinking through the implications of team-based learning. In Part II teachers from disciplines as varied as accounting, biology, business, ecology, chemistry, health education and law describe their use of team-based learning. They also demonstrate how this teaching strategy can be applied equally effectively in environments such as large classes, mixed traditional and on-line classes, and with highly diverse student populations. Part III offers a synopsis of the major lessons to be learned from the experiences of the teachers who have used TBL, as described in Part II. For teachers contemplating the use of TBL, this section provides answers to key questions, e.g., whether to use team-based learning, what it takes to make it work effectively, and what benefits one can expect from it-for the teacher as well as for the learners. The appendices answer frequently asked questions, include useful forms and exercises, and offer advice on peer evaluations and grading. A related Web site that allows readers to "continue the conversation," view video material, access indexed descriptions of applications in various disciplines and post questions further enriches the book. The editors' claim that team-based instruction can transform the quality of student learning is fully supported by the empirical evidence and examples they present. An important book for all teachers in higher education.
