Routledge Handbook of Southeast Asian Development Andrew McGregor 2017-11-06 Southeast Asia is one of the most diverse regions in the world – hosting a wide range of languages, ethnicities, religions, economies, ecosystems and political systems. Amidst this diversity, however, has been a common desire to develop. This provides a uniting theme across landscapes of difference. This Handbook traces the uneven experiences that have accompanied development in Southeast Asia. The region is often considered to be a development success story; however, it is increasingly recognized that growth underpinning this development has been accompanied by patterns of inequality, violence, environmental degradation and cultural loss. In 30 chapters, written by established and emerging experts of the region, the Handbook examines development encounters through four thematic sections: • Approaching Southeast Asian development, • Institutions and economies of development, • People and development and • Environment and development. The authors draw from national or sub-national case studies to consider regional scale processes of development – tracing the uneven distribution of costs, risks and benefits. Core themes include the ongoing neoliberalization of development, issues of social and environmental justice and questions of agency and empowerment. This important reference work provides rich insights into the diverse impacts of current patterns of development and in doing so raises questions and challenges for realizing more equitable alternatives. It will be of value to students and scholars of Asian Studies, Development Studies, Human Geography, Political Ecology and Asian Politics.

Postgraduate Outcomes of College Students Jerold S. Laguilles 2016-09-16 The post-graduation outcomes of college students are being more widely used as key metrics to demonstrate institutional effectiveness to both external agencies and internal stakeholders. Institutional research offices play an integral role in these data collection efforts. However, underlying challenges exist regarding obtaining an adequate amount of survey responses and salary or earnings information. This volume focuses on the first-destination outcomes (e.g., earnings, employment, graduate/ professional school enrollment) of college graduates while recognizing that other outcomes are also relevant across institutional settings. Through the use of current research, case studies, and best practices, each chapter highlights how postgraduate outcomes information is collected and used across the higher education spectrum. In this volume readers will learn: the internal and external demands for these data, the strengths and challenges of their data, and how to best communicate these data to various constituents. This is the 169th volume of this Jossey-Bass quarterly report series. Timely and comprehensive, *New Directions for Institutional Research* provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management.

Educational Assessment in a Time of Reform Coert Loock 2019-11-20 Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for

future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough . If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.

Cultivating Seeds of Hope Murray Coetzee 2015-05-01 This publication is a collection of 40 oral testimonies about Beyers Naud, but also about the apartheid era in general and about the role that Christianity played in that period. In addition to an abundance of insights on Beyers Naud, by those who knew him best, it offers perspectives on the movements and entities that Naud, associated himself with; for example, the Christian Institute, the South African Council of Churches and the people involved in both. Stories unfold ? of faith and suffering, as well as betrayal, all against the background of an overtly racist apartheid state and by implication against a capitalist system with class divisions that degraded human beings and denied their human dignity.ÿ

Fighting for Peace in Somalia Paul D. Williams 2018 Fighting for Peace in Somalia provides the first comprehensive analysis of the African Union Mission in Somalia (AMISOM), an operation deployed in 2007 to stabilize the country and defend its fledgling government from one of the world's deadliest militant organizations, Harakat al-Shabaab. The book's two parts provide a history of the mission from its genesis in an earlier, failed regional initiative in 2005 up to mid-2017, as well as an analysis of the mission's six most challenges, namely, logistics, security sector reform, civilian protection, strategic communications, stabilization, and developing a successful exit strategy. These issues are all central to the broader debates about how to design effective peace operations in Africa and beyond. AMISOM was remarkable in several respects: it would become the African Union's (AU) largest peace operation by a considerable margin deploying over 22,000 soldiers; it became the longest running mission under AU command and control, outlasting the nearest contender by over seven years; it also became the AU's most expensive operation, at its peak costing approximately US\$1 billion per year; and, sadly, AMISOM became the AU's deadliest mission. Although often referred to as a peacekeeping operation, AMISOM's troops were given a range of daunting tasks that went well beyond the realm of peacekeeping, including VIP protection, war-fighting, counterinsurgency, stabilization, and state-building as well as supporting electoral processes and facilitating humanitarian assistance.
