ECAI 2020 Giuseppe De Giacomo 2020-09-15 This book presents the proceedings of the 24th European Conference on Artificial Intelligence (ECAI 2020), held in Santiago de Compostela, Spain, from 29 August to 8 September 2020. The conference was postponed from June, and much of it conducted online due to the COVID-19 restrictions. The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology. The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence (PAIS 2020) held at the same time. A record number of more than 1,700 submissions was received for ECAI 2020, of which 1,443 were reviewed. Of these, 361 full-papers and 36 highlight papers were accepted (an acceptance rate of 25% for full-papers and 45% for highlight papers). The book is divided into three sections: ECAI full papers; ECAI highlight papers; and PAIS papers. The topics of these papers cover all aspects of AI, including Agent-based and Multi-agent Systems; Computational Intelligence; Constraints and Satisfiability; Games and Virtual Environments; Heuristic Search; Human Aspects in AI; Information Retrieval and Filtering; Knowledge Representation and Reasoning; Machine Learning; Multidisciplinary Topics and Applications; Natural Language Processing; Planning and Scheduling; Robotics; Safe, Explainable, and Trustworthy AI; Semantic Technologies; Uncertainty in AI; and Vision. The book will be of interest to all those whose work involves the use of AI technology.

the 36th International Conference Information Systems Architecture and Technology 2015, or ISAT 2015 for short, held on September 20-22, 2015 in Karpacz, Poland. The conference was organized by the Computer Science and Management Systems Departments, Faculty of Computer Science and Management, Wroclaw University of Technology, Poland. The papers included in the proceedings have been subject to a thorough review process by highly qualified peer reviewers. The accepted papers have been grouped into four parts: Part I—addressing topics including, but not limited to, systems analysis and modeling, methods for managing complex planning environment and insights from Big Data research projects. Part II—discussing about topics including, but not limited to, Web systems, computer networks, distributed computing, and multi-agent systems and Internet of Things. Part III—discussing topics including, but not limited to, mobile and Service Oriented Architecture systems, high performance computing, cloud computing, knowledge discovery, data mining and knowledge based management. Part IV—dealing with topics including, but not limited to, finance, logistics and market problems, and artificial intelligence methods.

Essentials of Nursing Informatics, 7th Edition Virginia K. Saba 2021-03-22 The single best resource for learning how technology can make the nursing experience as rewarding and successful as possible A Doody's Core Title for 2024 & 2023! Essentials of Nursing Informatics provides the information and insights readers need to manage and process data to improve the quality and outcomes of healthcare. Topics

include the use of computers in nursing administration, practice, education, and research; computer systems and information theory; electronic medical records, continuum of care information technology systems, and personal health records; coding; and government, clinical, and private sector system requirements. This revised and updated edition covers the latest changes in technology, administration, policy, and their effects on healthcare informatics in the U.S., with contributing international authors from Canada, South America, Europe, Asia, Australia, and New Zealand. The seventh edition includes section summaries, and each chapter includes sample test questions and answers. This updated seventh edition covers: Nursing Informatics Technologies Nursing Practice Applications System Standards Advanced Applications for the 4th Nursing IT Revolution System Life Cycle Educational Applications Informatics Theory Standards Research Applications Policies and Quality Measures in Healthcare

**Handbook of Research on Soft Computing and Nature-Inspired Algorithms** Shandilya, Shishir K. 2017-03-10 Soft computing and nature-inspired computing both play a significant role in developing a better understanding to machine learning. When studied together, they can offer new perspectives on the learning process of machines. The Handbook of Research on Soft Computing and Nature-Inspired Algorithms is an essential source for the latest scholarly research on applications of nature-inspired computing and soft computational systems. Featuring comprehensive coverage on a range of topics and perspectives such as swarm intelligence, speech recognition, and electromagnetic problem solving, this publication is ideally designed for students, researchers, scholars, professionals, and practitioners seeking current research on the advanced workings of intelligence in computing systems.

Digital Twins and Simulation Technology Lavanya Sharma 2025-07-04

This book provides a comprehensive overview of the concept of digital

twins, emphasising its strategic importance across various commercial domains. This book covers the fundamentals, data requirements, tools, and technologies essential for understanding and implementing digital twins. It discusses how digital twins are used for running simulations, analysing performance issues, and generating potential improvements to optimise business processes. The book explores the architecture, historical background, and real-time applications in sectors including urban planning, healthcare, smart cities, and manufacturing. Explains digital twin technology, including its core principles, architecture, and how it replicates physical objects in virtual platforms, in detail Covers the data types and tools necessary for creating and maintaining digital twins, including sensors, data processing systems, and integration methodologies Explores technologies such as Computer Vision, IoT, AI, ML, 5G, AR, and VR that drive the functionality and application of digital twins Analyses practical applications in diverse sectors like urban planning, smart cities, healthcare, manufacturing operations, and power-generation equipment, showcasing real-world use cases and benefits Examines real-time challenges and limitations associated with implementing digital twin technology, providing a balanced view of its capabilities and constraints It is a reference book for researchers, scholars, and students who are working or interested in learning about digital twin technology.

*Mastering Time - Innovative Solutions to Complex Scheduling Problems* Ali Soofastaei 2025-05-07 Time is one of our most valuable resources, yet managing it effectively is often one of the toughest challenges. Mastering Time - Innovative Solutions to Complex Scheduling Problems is a comprehensive guide introducing new methods and solutions to solve complex scheduling problems in professional contexts. By mastering these creative solutions, you can gain control over your time. This book presents practical strategies and tools to streamline workflows, optimize resource allocation, and tackle bottlenecks head-on. Whether you are managing multiple projects, balancing competing priorities, or simply

seeking to organize your time better, the insights provided in this book will help you unlock new levels of productivity and efficiency. With real-world examples, cutting-edge technologies like artificial intelligence, and time-tested techniques, *Mastering Time - Innovative Solutions to Complex Scheduling Problems* equips readers with the knowledge and tools to transform even the most challenging schedules into manageable, efficient plans. Dive into the future of scheduling, where complexity is simplified and time is truly mastered.

**Behavioural Types** Simon Gay 2022-09-01 Behavioural type systems in programming languages support the specification and verification of properties of programs beyond the traditional use of type systems to describe data processing. A major example of such a property is correctness of communication in concurrent and distributed systems, motivated by the importance of structured communication in modern software. *Behavioural Types: from Theory to Tools* presents programming languages and software tools produced by members of COST Action IC1201: Behavioural Types for Reliable Large-Scale Software Systems, a European research network that was funded from October 2012 to October 2016. As a survey of the most recent developments in the application of behavioural type systems, it is a valuable reference for researchers in the field, as well as an introduction to the area for graduate students and software developers.

**Learning Science: Theory, Research, and Practice** Robert S. Feldman 2019-08-09 Cutting-edge insights and perspectives from today's leading minds in the field of learning science The discipline of learning science is fast becoming a primary approach for answering one of the most important questions of our time: How do we most effectively educate students to reach their full potential? Spanning the disciplines of psychology, data science, cognitive science, sociology, and anthropology,

*Learning Science* offers solutions to our most urgent educational challenges. Composed of insightful essays from top figures in their respective fields, the book also shows how a thorough understanding of this critical discipline all but ensures better decision making when it comes to education. Chapters include: • Exploring Student Interactions in Collaborative Problem-Solving with a Multimodal Approach • Learning Science Research Through a Social Science Lens • Semantic Representation & Analysis and its Application in Conversation-based Intelligent Tutoring Systems • Advancing the Relationship Between Learning Sciences and Teaching Practice • Advancing the State of Online Learning: Stay Integrated, Stay Accessible, Stay Curious • Designing Immersive Authentic Simulations that Enhance Motivation and Learning • High School OER STEM Lessons Leading to Deep Learning, For Students and Teachers • How to Increase Learning While Not Decreasing the Fun in Educational Games Whether you're creating curricula, developing policies, or educating students in a classroom setting, *Learning Science* delivers the knowledge, insight, and inspiration you need to do your part to ensure every student meets his or her full potential.

**Brain Storm Optimization Algorithms** Shi Cheng 2019-06-03 Brain Storm Optimization (BSO) algorithms are a new kind of swarm intelligence method, which is based on the collective behavior of human beings, i.e., on the brainstorming process. Since the introduction of BSO algorithms in 2011, many studies on them have been conducted. They not only offer an optimization method, but could also be viewed as a framework of optimization techniques. The process employed in the algorithms could be simplified as a framework with two basic operations: the converging operation and the diverging operation. A "good enough" optimum could be obtained through recursive solution divergence and convergence. The resulting optimization algorithm would naturally have

the capability of both convergence and divergence. This book is primarily intended for researchers, engineers, and graduate students with an interest in BSO algorithms and their applications. The chapters cover various aspects of BSO algorithms, and collectively provide broad insights into what these algorithms have to offer. The book is ideally suited as a graduate-level textbook, whereby students may be tasked with the study of the rich variants of BSO algorithms that involves a hands-on implementation to demonstrate the utility and applicability of BSO algorithms in solving optimization problems.
