Working While Black LaToya T. Brackett 2021-02-08 In recent years, there has been a rise in diverse racial representation on television. In particular, Black characters have become more actualized and have started extending beyond racial stereotypes. In this collection of essays, the representation of Black characters in professionally defined careers is examined. Commentary is also provided on the portrayal of Black people in relation to stereotypes alongside the importance of Black representation on screen. This work also introduces the idea of Black-collar, a category which highlights the Black experience in white-collar jobs. The essays are divided into six parts based on themes, including profession, and focuses on a select number of Black characters on TV since the 1990s.

Development Practice in Eastern and Southern Africa Tshilidzi Madzivhandila 2022-03-29 This book is a rare collection of reflective and reflexive stories that reveal how seasoned academics, agents of grassroots social change, leaders and journalists transformed and shaped the development landscape in eastern and southern Africa. Whereas practical experiences are crucial assets and resources for shaping the academic environment and development practice landscape, most of the existing literature recommended as key learning materials in tertiary institutions is rarely in synch with the practical realities of development practice. The shared individual lived experiences from academic endeavours and fieldwork provide hands-on tools for students and emerging practitioners who might be involved in or are currently facilitating development work. The thrust of the book, therefore, is to demystify the day-to-day experiences of development practitioners while contributing to learning pathways or strategies for achieving viable solutions to the myriad of challenges, which grassroots communities face. The relevance of the book as a crucial resource for students

pursuing development-oriented degree programmes in colleges and universities is obvious. Without any doubt, the compilation will be handy in the implementation of diverse development-oriented transformation agenda at academic, programming and policy levels.

Higher Education - Reflections From the Field - Volume 1 2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections on 'The Perspectives of Higher Education', 'COVID as a Catalyst for Change', 'Embracing Online Learning as a Response to COVID', and 'Post Covid: The Way Forward'. It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.
