Design Portfolios Dianne Bender 2008-02-05

Students in the disciplines of architecture, interior design, and landscape design have always created traditional portfolios, which include all their projects in the form of physical objects that can be held and evaluated during an interview. With advances in technology, a digital version of the portfolio is becoming increasingly popular-but how does a student create one? And more important, how is it best utilized during an interview? Design Portfolios addresses these questions, moving beyond the simple checklist of skills and accomplishments that a portfolio should showcase. Quotations from practicing designers reinforce the author's guidelines for creating, maintaining, and presenting both traditional and digital portfolios. This book teaches students how to use their portfolios as a marketing tool for the most important thing they will ever sell-themselves!Features- Quotes from approximately 100 practicing architects, interior designers, and landscape architects from across the United States.- Presents a 4-step process of

gathering and organizing the contents of a portfolio for the best effect.- Utilizes work of undergraduate and graduate design students to model successful portfolios.- Shows how to customize a portfolio for specific customers.- Offers tips for the job hunt, preparation of a powerful résumé, and interview strategies.- Instructor's Guide provides suggestions for planning the course and using the text in the classroom

Learning Autodesk VIZ Sham Tickoo 2004
This text is designed as a hands-on supplement to classroom instruction. Major aspects of the software Autodesk VIZ, Release 4, are presented in step-by-step tutorials. These tutorials allow the reader to learn by doing. The procedures outlined in the text are reinforced by printed screen images. The text consists of 17 tutorials. At the end of each tutorial is a Self-Evaluation Test. This measuring device is used to check student progress and understanding of the software and 3D modeling concepts. Five
