"Hundreds of companies were building vehicles for military as well as civilian use during this time. From their beginnings until their demise, the histories of 225 of the companies that manufactured cars, trucks and motorcycles for the civilian market are provided, along with representative illustrations and specs for each company that existed in 1917 and 1918"--

How to Build a Kit Bike Jonathan Wood
2002-10 Scratch built motorcycles remain very popular. In order to simplify the process, many companies in the American V-twin aftermarket are selling kits. Three of these companies, Custom Chrome, Arlen Ness and Biker1s Choice, have excellent programs. All offer very complete kits that allow the builder to assemble a complete motorcycle without any additional purchases. All that's missing is labor and paint. The book will document, with detailed photos and copy, the assembly from beginning to end, of three motorcycles from the firms mentioned above. Because of the technical nature of this book, there will be more images and less copy than in other Wolfgang Publication books. Each sequence will be illustrated by at least 200 images. Approximately 60% of these images will be in color. This book will also contain side-bars on tools and basic assembly techniques, all designed to aid the first time builder.
