Making it Easy Elaine F. Marcus 1986 Abstract: A variety of cooking and crafts activities designed for use with handicapped learners are presented in this book that stresses a learn-by-doing approach to skills development. Each activity focuses on developing at least one of the following developmental areas: fine motor, language, cognitive, and pre-vocational. Activity categories include printing, molding, painting, pasting, cutting, sewing, and weaving, as well as cooking. Activities were designed to be flexible enough to meet a wide range of learner abilities in many kinds of learning environments. Individual activities identify necessary pre-requisite skills, materials, and methods; suggestions for additional items to teach and to make are also included. An instructor's guide 1) explains each component of the activity materials, 2) provides step-by-step instructions for planning and conducting activities, and 3) suggests ways to help learners apply their knowledge and skills in a variety of situations.
