*Cultural Transmission and Material Culture*

Miriam T. Stark 2008-11-13 How and why people develop, maintain, and change cultural

boundaries through time are central issues in the social and behavioral sciences in general and anthropological archaeology in particular. What factors influence people to imitate or deviate from the behaviors of other group members? How are social group boundaries produced, perpetuated, and altered by the cumulative outcome of these decisions? Answering these questions is fundamental to understanding cultural persistence and change. The chapters included in this stimulating, multifaceted book address these questions. Working in several subdisciplines, contributors report on research in the areas of cultural boundaries, cultural transmission, and the socially organized nature of learning. Boundaries are found not only within and between the societies in these studies but also within and between the communities of

scholars who study them. To break down these boundaries, this volume includes scholars who use multiple theoretical perspectives, including practice theory and evolutionary traditions, which are sometimes complementary and occasionally clashing. Geographic coverage ranges from the indigenous Americas to Africa, the Near East, and South Asia, and the time frame extends from the prehistoric or precontact to colonial periods and up to the ethnographic present. Contributors include leading scholars from the United States, Canada, the United Kingdom, and Europe. Together, they employ archaeological, ethnographic, ethnoarchaeological, experimental, and simulation data to link micro-scale processes of cultural transmission to macro-scale processes of social group boundary formation, continuity, and change.

Introducing Audiovisual Translation Agnieszka Szarkowska 2024-09-30 This user-friendly textbook offers comprehensive insights into all facets of audiovisual translation and media localisation. Serving as a comprehensive guide spanning seven chapters, it begins by introducing audiovisual translation (AVT). It goes on to explore the historical backdrop and highlights the distinctions from traditional written text translation. The authors expertly navigate you through the primary AVT modalities: interlingual subtitling, dubbing, voice-over, subtitling for the deaf and hard of

hearing, live subtitling, and audio description. A blend of theoretical concepts and practical, real-world examples in various languages ensures a seamless understanding of the fundamental principles of AVT. The book clearly guides you through the most important aspects of each type of AVT. Designed for those exploring various AVT forms, budding audiovisual translators, and those interested in contemporary AVT trends and research, this book is an invaluable resource for students of translation and linguistics and for educators in AVT across higher education and media localisation programmes.
