Mathematics-I Dr. E. Gouthami 2025-11-25 Mathematics forms the backbone of science, engineering, and technology, providing a precise language and powerful tools for modeling, analysis, and problem solving. The subject Mathematics-I is the foundation course for undergraduate students, particularly in engineering, science, and technology programs, where mathematical concepts play a crucial role in understanding and applying core technical subjects. This book, Mathematics-I, is the result of a collaborative effort by a team of experienced academicians and researchers from diverse institutions. Each contributor brings domain expertise, classroom experience, and research insight, ensuring that the content is academically rigorous, pedagogically sound, and aligned with current university curricula. The multi-author approach has enabled the integration of varied perspectives, teaching methodologies, and problem-solving strategies, enriching the overall quality of the book. The primary objective of this book is to present fundamental mathematical concepts—such as calculus, differential equations, linear algebra, and vector analysis—in a clear, systematic, and student-friendly manner. Emphasis has been placed on conceptual clarity, logical development, and step-by-step explanations, enabling learners to build strong analytical

skills. Numerous worked examples, illustrative diagrams, and graded exercises have been included to reinforce understanding and enhance problem-solving ability. This textbook is designed to meet the requirements of first-year undergraduate students across engineering and science disciplines and is structured in accordance with Outcome-Based Education (OBE) and NEP-2020 guidelines. Care has been taken to balance theory with applications, helping students appreciate the relevance of mathematical principles in real-world engineering and scientific problems. The authors sincerely hope that this book will serve as a valuable resource for students, a dependable reference for teachers, and a useful guide for self-learners.
