The Balance Sheet 1924

National Survey Results on Drug Use from the Monitoring the Future Study, 1975-1998. Volume II Lloyd Johnston 1999 This second volume, in a two-volume set reporting the results from the Monitoring the Future study, presents the results of the 1977 through 1998 follow-up surveys of the graduating high school classes of 1976 through 1997 as they have progressed through young adulthood. This current study, which draws the college sample in the senior year of high school, has considerable advantages for generating a broadly representative sample of the college students to emerge from each graduating cohort. It has "before, during, and after" college measures, which permit the examination of change. It also has similar panel data on the high school graduates who did not attend college. In order for this volume to stand alone, some material from Volume I is repeated. Chapters 2 and 3 in this volume are the same as Chapters 2 and 3 in Volume I, since one provides an overview of the key findings and the other explains the study's design and procedures. Chapter titles include: (1) "Introduction of Volume II"; (2) "Overview of Key Findings"; (3) "Study Design and Procedures"; (4) "Prevalence of Drug Use among Young Adults"; (5) "Trends in Drug Use among Young Adults"; (6) "Attitudes and Beliefs about Drugs among Young Adults"; (7) "The Social Milieu for Young Adults"; (8) "Prevalence of Drug Use among College Students"; and (9) "Trends in Drug Use among College Students." (Contains 30 tables and 66 figures.) (JDM)
