The Emergence of Word-Meaning in Early China Jane Geaney 2022-07-01 The Emergence of Word-Meaning in Early China makes an innovative contribution to studies of language by historicizing the Chinese notion that words have "meaning" (content independent of instances of use). Rather than presuming that the concept of word-meaning had always existed, Jane Geaney explains how and why it arose in China. To account for why a normative term (yi, "duty, morality, appropriateness") came to be

used for "meanings" found in dictionaries, Geaney examines interrelated patterns of word usage threading through and across a wide range of genres. These patterns show that by the first millennium, as textual production exploded—and as radically different writing forms (in Buddhist sutras) were encountered—yi already functioned as an externally accessible "model" for semantic interpretation of texts and sayings. The book has far-reaching implications. Because the idea of word-meaning is fundamental to theorizing, the book illuminates not only semantic ideas and the normativity of language in Early China, but also aspects of early Chinese philosophy and intellectual history. As the internet supplants one form of media (print), thereby reducing knowledge to vast digital databases, so too, this book explains, two thousand years ago a culture that prized oral and visual balance became an "empire of the text."

Narrative Worlds and the Texture of Time Rosemary Huisman 2022-09-30 This book brings together a model of time and a model of language to generate a new model of narrative, where different stories with different temporalities and non-chronological modes of sequence can tell of different worlds of human - and non-human - experience, woven together (the 'texture of time') in the one narrative. The work of Gerald Edelman on consciousness, J.T. Fraser on time, and M.A.K. Halliday on language is introduced; the categories of systemic functional linguistics are used for detailed analysis of English narrative texts from different literary periods. A summary chapter gives an overview of previous narrative studies and

theories, with extensive references. Chapters on 'temporalization' and 'spatialization' of language contrast the importance of time in narrative texts with the effect of 'grammatical metaphor', as described by M.A.K. Halliday, for scientific discourse. Chapters on prose fiction, poetry and the texts of digital culture chart changes in the 'texture of time' with changes in the social context: 'narrative as social semiotic'.

Standards and Reference in Early Chinese Philosophy of Language Susan Blake 2025-12-11
 Philosophy of Language in Early China characterizes early Chinese philosophy of language through

a focus on standards ('fa') and the activity of giving examples ('ju'). It argues that standards are understood by early Chinese philosophers to provide the groundwork for judgment and language, not only in the Mohist school, but also in other thinkers from the Warring States and early Han, particularly the Zhuangzi and Xunzi. Blake demonstrates that standards and examples provide a way to identify the reference of words and assess others' judgments and linguistic competence, similar to some theories found in contemporary analytic texts. They also discuss the ways in which the Mohist account goes beyond a discussion of reference through a focus on communication and predication. Providing new insights into ancient Chinese thought and the nature of language, this book will be of interest to those working in comparative philosophy, philosophy of language, Chinese philosophy and East Asian studies.

Discourse Phenomena in Typological Perspective

Alessandra Barotto 2023-03-15

This book aims at investigating discourse phenomena (i.e., linguistic elements and constructions that help to manage the organization, flow, and outcome of communication) from a typological and cross-linguistic perspective. Although it is a well-established idea in functional-typological approaches that grammar is shaped by discourse use,

systematic typological cross-linguistic investigations on discourse phenomena are relatively rare. This volume aims at bridging this gap, by integrating different linguistic subfields, such as discourse analysis, pragmatics, and typology. The contributions, both theoretically and empirically oriented, focus on a broad variety of discourse phenomena (ranging from discourse markers to discourse function of grammatical markers, to strategies that manage the discourse and information flow) while adopting a typological perspective and considering typologically distant languages.
