The Washingtons. Volume 7, Part 1 Justin Glenn 2016-08-19

This is the seventh volume of Dr. Justin Glenn's comprehensive history that traces the "Presidential line" of the Washingtons. Volume one began with the immigrant John Washington, who settled in Westmoreland Co., Va., in 1657, married Anne Pope, and became the great-grandfather of President George

Washington. It continued the record of their descendants for a total of seven generations. Volume two highlighted notable members of the next eight generations, including such luminaries as General George S. Patton, the author Shelby Foote, and the actor Lee Marvin. Volume three traced the ancestry of the early Virginia members of this "Presidential Branch" back to the royalty and nobility of England and continental Europe. Volumes four, five, and six treated respectively generations eight, nine, and ten. Volume Seven presents generation eleven, comprising more than 10,000 descendants of the immigrant John Washington. Although structured in a genealogical format for the sake of clarity, this is no bare bones genealogy but a true family history with over 1,200 detailed biographical narratives. These strive to convey the greatness of the family that produced not only The Father of His Country but many others, great and humble, who struggled to build

that country. Volume Seven, Part One covers the descendants of the immigrant's children Lawrence and John Washington, Jr. Volume Seven, Part Two covers the descendants of the immigrant's child Anne (Washington) Wright.

UFO Secrets Inside Wright-Patterson Thomas Carey
 2019-06-01 "Carey and Schmitt show that good, old-fashioned investigative reporting is still alive and well." —Cheryll Jones, former anchor, CNN News The true nature of what actually crashed in Roswell, New Mexico, in 1947 remains classified. Only a select few have ever had access to the truth about what became known as Area 51. But what happened to the remnants of that crash is shrouded in even greater mystery. What began in the high desert of New Mexico ended at Wright-Patterson, an ultra-top-secret Air Force base in Dayton, Ohio. The physical evidence of extraterrestrial visitation was buried deep within this nuclear stronghold. How tragic that such seismic news should be kept from the people of the world . . . pieces of history, now quickly dwindling into oblivion as the last of the secret-keepers passes on. In addition to its rich history of military service to our nation, Wright-Patterson

also stands as the secret tomb of one of the greatest occurrences in recorded history. Be prepared . . . the real Area 51—Wright-Patterson's vault—is about to be opened. *UFO Secrets Inside Wright-Patterson* is a thoroughly researched work that includes:

- New eyewitness accounts from the late Leonard Stringfield's files about the crash retrieval evidence stored at Wright-Patterson
- New testimonies from the late Emmy-award-winning TV reporter Carl Day concerning physical evidence of crashed UFOs stored in underground facilities at Wright-Patterson
- Newly discovered Project Blue Book files from Wright-Patterson including photos and Air Force investigations of UFOs.

Accrediting boards, the federal government, and state legislatures are now requiring a greater level of accountability from higher education. However, current accountability practices, including accreditation, No Child Left Behind, and performance reporting are inadequate to the task. If wielded indiscriminately, accountability can actually do more harm than good. This innovative work looks broadly at how accountability is being considered by campuses, accrediting boards, higher education organizations, and governments in the US and abroad. It explores how new demands for accountability and new technologies are changing the way student learning is assessed. The author, one of the most respected assessment researchers in the nation, provides a framework for assessing student learning and discusses historical and contemporary debates in the field. He details new directions

in assessment, such as the Collegiate Learning Assessment he helped develop, analyzes exemplary campus assessment programs, and proposes considerations necessary for designing successful accountability systems.
