Complete Revision Guide for MRCOG Part 2 Justin C. Konje 2019-11-27 The examination for Membership of the Royal College of Obstetricians and Gynaecologists (MRCOG) remains one of the most internationally recognised postgraduate examinations in the specialty. Over the years, the examination has evolved in keeping with changes in medical education; the Part 2 examination now consists of two papers made up of Single Best Answer (SBA) questions and Extended Matching

Questions (EMQ). This invaluable resource consists of 400 SBA questions (200 in Obstetrics and 200 in Gynaecology), followed by 400 EMQs (200 in Obstetrics and 200 in Gynaecology), grouped into papers, to provide enough material to guide preparations and to give some practice experience of the examination formats. All the questions have answers with explanations and sources of evidence. In preparing for the examination, candidates should make repeated references to these sources of evidence. There is also general advice on how to prepare for the examination and discussion of the reasons why trainees fail the examination.

Get Through MRCOG Part 2 Rekha Wuntakal 2018-03-09 *Get Through MRCOG Part 2: SBAs* provides 3 exams' worth of questions mapped to the RCOG syllabus in the newly introduced SBA style. With detailed explanations and relevant references to guidelines, this is the definitive resource for those taking the MRCOG Part 2 examination.

Nursing Management of Women's Health Debra Holloway 2019-07-17 This book covers all the gynecological areas where nurses undertake a key role in managing and leading the care of women. With the constant evolving role of nurses, many of them have been at the forefront of changing practice and breaking through boundaries in areas traditionally carried on by medics. This volume guides those nurses in enhancing their role and moving the practice forward. Paramount within this care is the desire to ensure that women are treated by the right person with the right skills and with dignity to manage intimate and personal issues that have a great effect on quality of life. This book offers best practice guidelines and references to underpin practice and practical tips and hints. It examines many aspects of women's health, from menstrual dysfunction and bleeding, specific adolescent issues, fertility and infertility, to early pregnancy problems, management of pregnancy's termination, urogynecological issues, ambulatory and outpatient procedures and menopause. This volume provides readers with a guide to care for women from the nurse specialist expertise. Many different subspecialties exist in gynecology, and nurses have to take the lead in caring for women, especially for those looked after within the outpatient

setting. In addition to the nursing management of these women, some nurses undertake procedures as hysteroscopy and move the care of these women from surgery to an ambulatory setting. This work is written by and dedicated to specialist and practitioners nurses.
