Unless you are an IT expert yourself, you will likely spend too much time and resources trying to address your technology predicaments, and you may even lose money trying to tackle this yourself rather than hiring a professional. These decisions can make or break a business in some cases, so they certainly should not be handled lightly. In order for your small business to succeed in the long run, your employees, clients, and technology need to work together seamlessly. You need a partner with experience in staying ahead of the game, and David can help you find that someone.
