Morgan becomes even more frightened when she learns she has to go to court and tell the judge about the older girl who hurt her at school. And as if that is not enough, Morgan's fear grows worst and she is unable to sleep when she finds out that one of her classmates and friend has died in a car accident. All she can think about is death. **Nutrition and Sustainable Development Goal 10: Reduced Inequalities, 2nd edition** Emmanuel Cohen 2025-03-03 Building on the Millennium Development Goals, the UN Sustainable Development Goals (SDGs) are the cornerstone of the 2030 Agenda for Sustainable Development, billed by the UN as "an agenda of unprecedented scope and significance." These seventeen goals are conceived as integrated, indivisible, and as balancing the economic, social and environmental dimensions of sustainable development. To be achieved by 2030, the goals are organized around five core pillars: people, planet, prosperity, peace and partnership. As a member of the SDGs Publishers Compact, Frontiers is committed to advocating the themes represented by the SDGs and accelerating progress to achieve them. Nutrition sits at the heart of the SDGs. In addition to achieving 'Zero Hunger' (SDG2), improvements in nutrition are critical to both achieve and reap the benefits of all seventeen global goals. With good nutrition comes improved health and wellbeing (SDG3), enhanced educational and work productivity (SDGs 4 and 8), less poverty (SDG1) and reduced inequalities (SDGs 5 and 10). And with stronger and more sustainable

environments, communities, and technologies (SDGs 6, 7, 9, 11-17) improved food security and nutrition will follow. As part of an innovative collection showcasing nutrition in the context of the SDGs, this Research Topic will focus on Sustainable Development Goal 10: Reduced Inequalities. We welcome Original Research, Review, and Perspective articles covering topics including but not limited to: ● Sociocultural aspects of health and wellbeing ● Socio-ecological profiles of food consumption in urban populations ● Diversity of socio-ecological profiles of food consumption in specific populations ● Assessing the frequency of socio-ecological profiles of food consumption oriented to local and alternative food productions ● Sociodemographic characteristics of consumers using local food productions ● Barriers (social, economic, geographic and cultural) relative to dietary strategies mobilising local food productions ● Relationships between soil microbial diversity and practices in alternative agriculture, food quality, and the corresponding influence on human health and human microbiota diversity. ● Assessing the real and the perceived impact of the effects of food in alternative agriculture on health.
