Digital Transformation in Data-Driven Financial Compliance: A Business Analyst's Guide 2025 Author :1- SANJAY C. VICHARE Author :2- PROF. NITIN JAIN PREFACE The world of finance is undergoing a profound transformation. As businesses adapt to an increasingly complex and interconnected global economy, the traditional models of financial management, risk assessment, and reporting are being challenged. Driven by rapid technological advancements, artificial intelligence (AI), advanced analytics, and enterprise solutions like SAP are reshaping how organizations approach finance. These technologies are not merely enhancing existing practices; they are fundamentally changing the way businesses operate, make decisions, and drive growth. This book, "Digital Transformation in Data-Driven Financial Compliance: A Business Analyst's Guide", aims to provide an in-depth exploration of how emerging technologies are revolutionizing financial functions across industries. By diving deep into the ways in which AI, analytics, and SAP solutions enable businesses to thrive in an increasingly digital and data-driven world, this book offers both theoretical insights and practical strategies for financial leaders, executives, and professionals navigating the future of finance. At the heart of this transformation is the need to do more with less: to make faster, more informed decisions, to ensure regulatory compliance while managing risk, and to unlock the true potential of financial data. With the advent of AI, companies can harness vast amounts of data to predict trends, automate processes, and uncover insights that were previously out of reach. Through this book, we explore how these technologies are helping finance professionals shift from the back-office to the boardroom, becoming key players in shaping corporate strategy. We delve into the AI-driven insights that are making finance more agile, the analytics tools that are enabling better forecasting and decision-making, and the SAP solutions that are connecting finance to the broader organization, breaking down silos, and ensuring that

financial processes align with business goals.

Data Science for Beginners Oluchi Ike 2024-12-02 Welcome to Data Science for Beginners: A Practical Guide to Getting Started. If you've ever been curious about how to make sense of the growing amount of data in the world or wondered how data-driven decisions are made, then you've picked the right book. Whether you're a student, a professional switching careers, or simply someone interested in learning what data science is all about, this guide will give you a solid foundation to start your journey. Data science has rapidly become one of the most important fields across various industries—from business to healthcare to technology. Despite its growth, the concept can often feel intimidating, especially for beginners. This book aims to break down those barriers by explaining complex ideas in an easy-to-understand manner, offering step-

by-step examples, and providing real-world projects that will help you apply what you learn. We'll cover the essential tools and techniques you need to get started, including basic statistics, data cleaning, visualization, and simple machine learning models. Along the way, you'll be introduced to Python, one of the most popular programming languages for data science, and key libraries such as Pandas and Matplotlib. This is not just a textbook but a practical guide. By the end of the book, you will have worked on projects that simulate real-world data science tasks, and you'll gain the confidence to pursue more advanced topics. The path to becoming a data scientist can be long, but with this guide, you'll take your first steps with clarity and direction. Thank you for choosing this book. I'm excited to accompany you on this rewarding journey into the world of data science! Happy learning! Oluchi Ike

Research Challenges in Information Science Samira Cherfi
2021-05-07 This book constitutes the proceedings of the 15th International Conference on Research Challenges in Information Sciences, RCIS 2021, which was planned to take place in Limassol, Cyprus, but had to change to an online event due to the COVID-19 pandemic. The conference took place virtually during May 11-14, 2021. It focused on the special theme "Information Science and Global Crisis". The scope of RCIS is summarized by the thematic areas of information systems and their engineering; user-oriented approaches; data and information management; business process management; domain-specific information systems engineering; data science; information infrastructures, and reflective research and practice. The 29 full papers and 6 work-in-progress papers presented in this volume were carefully reviewed and selected from 99 submissions. They were organized in topical sections named: Business and Industrial Processes, Information Security and Risk Management, Data and Information Management, Domain-specific Information Systems Engineering, User-Centered Approaches, Data Science and Decision Support, and Information Systems and Their Engineering. The volume also contains 13 poster and demo papers, and 4 doctoral consortium papers. In addition, two-page summaries of tutorials and research project papers can be found in the

back matter.
