Now in a second edition, this textbook surveys the channels, platforms, and programming through which television distribution operates, with a diverse selection of contributors providing thorough explorations of global media industries in flux. Even as legacy media industries experience significant

disruption in the face of streaming and online delivery, the power of the television channel persists. Far from disappearing, television channels have multiplied and adapted to meet the needs of old and new industry players alike. Television viewers now navigate complex choices among broadcast, cable, and streaming services across a host of different devices. From Networks to Netflix guides students, instructors, and scholars through that complex and transformed channel landscape to reveal how these industry changes unfold and why they matter. This second edition features new players like Disney+, HBO Max, Crunchyroll, Hotstar, and more, increasing attention to TV services across the world. An ideal resource for students and scholars of media criticism, media theory, and media industries, this book continues to offer a concrete, tangible way to grasp the foundations of television—and television studies—even as they continue to be rewritten.

Off-Track and Online Holly Kruse 2016-04-01 How horse racing's pioneering use of communication and information networks helped shape the modern media, information, and leisure environment. The horse racing industry has been a pioneer in interactive media, information networks, and their deployment. The race track and the off-track betting parlor offer interactive media environments that reconfigure the relationships among private and public space and presence and copresence. In this book, Holly Kruse explores how horse racing has used media over the last several decades, arguing that examining the history and context of horse racing and gambling gives us a clearer understanding of the development of data networks, media complexes, public entertainment, and media publics. Kruse describes an enormous industry that depends on global information and communication flows made possible by a network linking

racetracks, homes, off-track betting, farms, and auction sites. Racetrack architecture now allows for the presence of screens, most showing races from other locations. Online betting sites enable bettors to wager from home. Off-track betting facilities collect wagers on races from all over the country. Odds are set interactively through the pari-mutuel market system. Kruse considers the uses of public space, and its redefinition by public screens; the effect of interactive media on the racing industry, including networked, in-home betting; the "technopanic" over online poker and the popularity of in-home pari-mutuel wagering; and the use of social media by racing fans to share information and creative work with no financial payoff.
