Gillies 2023-03-29 This volume captures contemporary global developments in cooperative learning (CL) across varied educational contexts, levels, and disciplines. With chapters from contributors throughout the Global North and South, this comprehensive volume offers a wide-ranging perspective and addresses a range of cooperative learning pedagogies including relational, online, and peer learning, STAD, the Jigsaw model, and dialogic talk. The chapters draw on novel empirical research and theory to highlight best practices in cooperative learning, whilst also considering the challenges, limitations, and factors which drive or inhibit learner engagement and success. Consistent attention is given to the pivotal role of the educator in implementing cooperative learning to maximum benefit to enhance students' affective, social, cognitive, and metacognitive learning. Applying Depth of Knowledge and Cognitive Rigor Karin Hess For more than 2 decades, Karin Hess has worked with the concept of depth of knowledge (DOK) and expanded applications of cognitive rigor across content areas and grade levels, proving that every student can experience deeper learning. This interactive book offers a self-guided journey beginning with the basics: what DOK is, what it is not, and debunking common misconceptions about rigor. Each module is framed by frequently asked questions and provides practical tools and strategies for applying a cognitive mindset that supports student-centered classrooms—from planning instruction that shifts student roles from taking in information to constructing meaning, to monitoring progress with assessments that uncover thinking. This unique, action-oriented workbook is a perfect companion to Karin's earlier books and a great DOK refresher for PK-12 staff! The Art and Science of Lesson Design John R. Walkup 2020-01-11 The Cognitive Rigor Matrix superposes two of the most common tools used in K-12 education: Bloom's Revised Taxonomy and Depth of Knowledge. This matrix has been adopted by numerous state departments of education and national organizations to evaluate the rigor of educational materials. The matrix also offers a powerful ability to help teachers plan and carry out standards-based lessons that best support student learning. This book, aimed at secondary school teachers of all subjects, provides a systematic means of leveraging the Rigor Cube to develop rigorous, standards-based lesson plans. The approach employed in this book includes the development of culminating activities for students to demonstrate their learning, identification of standards-based lesson content, selection of potentially effective instructional methods, and student questioning strategies. Special methods for supporting students who are deficient in their background knowledge without undermining the rigor of lessons are also included. Sample lessons are included that illustrate every step of the lesson planning process from start to finish. These sample lesson plans address state content standards related to the Common Core State Standards (both math and English language arts), Next Generation Science Standards, career-technical education standards, and art.
