Economics and the Environment Eban S. Goodstein 2020-06-02 Now in its ninth edition, Economics and the Environment offers an accessible approach to the latest debates, concerns, standards, and legislation related to contemporary environmental issues. Featuring new and updated content throughout, this student-friendly textbook organizes its discussion around four specific questions — How much pollution is too much? Is the government up to the job? How can we do better? How can we resolve global issues? — to provide an inclusive and highly-engaging examination of environmental economics. Following a unique four-question format, the text provides an integrated pedagogy that is simpler and more useful than a “topics” approach to the subject. Students are encouraged to discuss the government’s role in environmental policy, the benefits and costs of environmental protection, methods for promoting clean technology and sustainability, global pollution and resource issues, environmental justice and ethics, and more. Throughout the text, illustrative examples and real-world case studies are complemented by end-of-chapter problems and exercises that both strengthen student comprehension and increase retention.

Economic Survey of Latin America and the Caribbean 2022 United Nations Publications 2023-05-02 The 2022 edition of the Economic Survey of Latin America and the Caribbean outlines the region's economic performance in 2021 and analyses trends in the early months of 2022, as well as the outlook for growth for the year. It examines the external and domestic factors that have influenced the region's economic performance in 2021, trends for 2022, and how these factors will affect economic growth in the coming years. This edition also presents some of the main challenges the region faces in investing for sustainable and inclusive economic growth. It analyses the trends in total investment over the last 70 years and highlights the profound change brought about by the 1980s debt crisis, with a slowdown in investment from the 1990s onwards.

Methodology of Islamic Economics Necmettin Kizilkaya 2019-11-05 In its pursuit to equip the reader with a basic knowledge of Islamic economics, this book divulges the micro-foundations of the discipline, and highlights the predominant schools of thought that exist in the field. It explains, in simple terms, what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran, the Sunnah and the Islamic intellectual tradition based on these two sources. The book familiarizes the reader with knowledge of the basic maxims of the discipline. It then establishes the arguments that are presented by the proponents of religion-based economics, specifically Islam, and apprises readers about the aforementioned schools as they exist. A number of chapters consider the dimension of the dilemmas the discipline is facing, and the chronological progress of the field is reviewed, hence providing a comprehensive overview of the topic. The book deals with the issues about the origins of Islamic economics, the basic methodological questions, the use of the opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations. It offers practical solutions, despite the differing schools of thought, not unlike the development of conventional Economics where radical differences between Keynesian, Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a discipline. This guide will provide both students and researchers in Comparative Economic Studies, Islamic Economics and Islamic Finance with an essential overview of the field.

An Analysis of “Quality Minus Junk” Strategies. The Asset Pricing Factor Mark Matern 2017-08-09 Bachelor Thesis from the year 2015 in the subject Business economics - General, grade: 1,3, University of Mannheim, language: English, abstract: This term paper deals with the strategy called “quality-minus-junk” (QMJ). The reader will see that both abnormal returns, characterized as alpha, and excess returns, characterized as returns above the risk-free rate, are consistently high for any of the three major asset-pricing models. This particular thesis is going to go through the main findings and observations that Asness, Frazzini and Pedersen have made in their research on the QMJ factor and is also going to extend on some further examination of QMJ. The upcoming chapter briefly discusses the reason behind using the Gordon Growth Model as the basis of the quality score and the four main quality measures which were used in the design of the QMJ strategy. Chapters 3, 4 and 5 retest the findings by using three years of additional data and its most recent updates in May 2015. In Chapter 3 are tests which were performed for different levels of quality. Chapter 4 will focus on the role of the QMJ factor in pricing other risk factors and Chapter 5 analyzes QMJ for different economic environments. Therefore new aspects will be added to the analysis. In Chapter 6 the readers will see how the QMJ strategy has performed during different levels of the sentiment index and the last Chapter deals with the Q-factor model to see how well it explains the QMJ factor performance. There are three main questions that are pursued and dealt with in this thesis. 1. What has changed in terms of the main findings for the QMJ strategy with the new and updated data? 2. The price of quality and the premium paid for higher quality constantly changes, especially for different market cycles and environments. It would therefore be interesting to see what one of the most popular measures of market sentiment, the sentiment-index by Baker and Wurgler, can tell us about the QMJ factor and vice versa. And the last question: Is there any potential relation between the two?
