Status of Water Supply, Sanitation, and Solid Waste Management in Urban Areas Usha P. Raghupathi 2005 Evaluation study.

India's Water Futures K. J. Joy 2018-11-01 When it comes to water, we flush and forget. We use, abuse and almost never recycle. Water sector in India, since the 1990s, has seen some new ideas formalised legally and institutionally, while others are still emerging and evolving. Confronting the reality of current water management strategies, this volume discusses the state of the Indian water sector to uncover solutions that can address the imminent water crises. This book: Analyses the growing water insecurity, increase in demand, inefficiency in water use, and growing inequalities in accessing clean water; Sheds light on water footprint in agricultural, industrial and urban use, pressures on river basin management, depleting groundwater resources, patterns of droughts and floods, watershed based development and waste water and sanitation management; Examines water conflicts, lack of participatory governance mechanisms, and suggests an alternative framework for water regulation and conflict transformation; Highlights the relationship between gender discourse and water governance; Presents an alternative agenda for water sector reforms. This volume, with hopes for a more water secure future, will interest scholars and researchers of development studies, environment studies, public policy, political studies, political sociology, and, NGOs, media and think tanks working in this area.

A Vision for Environmental Sustainability: Overcoming Waste Management Challenges in Developing Countries Ashootosh Mandpe
2025-07-11 This book encapsulates numerous ideas for developing novel strategies toward sustainable waste management, incorporating technology transfer and capacity building for sustainable waste

management, and enforcing the stringent policy framework for environmental protection from improper waste management practices. Sustainable waste management is a complex issue that is of increasing concern in developing countries. In these countries, waste management often faces significant challenges due to factors such as inadequate infrastructure, lack of funding and resources, and limited public awareness of the importance of waste management. However, there are also significant opportunities to improve waste management practices and create a more sustainable future. One of the major challenges of waste management in developing countries is inadequate infrastructure. Many developing countries lack the necessary infrastructure to properly manage waste, including landfills, recycling facilities, and waste treatment plants. This leads to significant environmental and health problems, including water pollution, soil contamination, and the spread of disease. This book is an essential resource for researchers and students studying solid waste management, waste valorization, biorefineries, biofuels/products/processes, as well as for geo-environmental engineers, biochemical/chemical engineers, and biotechnologists working in industries and government agencies, policymakers, conservationists, NGOs working for environment protection, etc. The authors are thankful to the contributors of these books for their cooperation and patience in the compilation of this task. The authors are also thankful to Springer team, for their constant support in the publication of this work.

Urban Panorama 2015 Urbanization and the urban scenario in India.

Urbanization in the Global South Kala S Sridhar 2021-09-16 This book examines the challenges of urbanization in the global south and the linkages between urbanization, economic development and urban poverty from the perspectives of cities in Asia, Africa and Latin America. It focuses on various aspects of urbanization ranging from food security and public services like sanitation, water and electricity to the finances of cities and externalities associated with the urbanization process. The volume also highlights the importance of participatory urban governance for cities in India with comparative perspectives from other countries. It

further focuses on the urbanization of poverty, livelihood in urban areas, overconsumption and nutrition and ecology. Based on primary data, the chapters in the volume review trends, opportunities, challenges, governance and strategies of several countries at different levels of urbanization, with several case studies from India. This multidisciplinary volume will be of great interest to researchers and students of development studies, sociology, economics and urban planning and policy. It will also be useful for policymakers, think tanks and practitioners in the area of urbanization.

Cities: Inclusive, Liveable, and Sustainable Ashish Kumar Srivastava 2025-05-30 With cities acting as magnets for population concentration and economic growth, urban planning takes a center stage. Lack of planning can have severe social, cultural, economic and political repercussions in cities. Cities: Inclusive, Liveable, and Sustainable scrutinizes the paradigms of Urban Planning that keep at the forefront both the citizen and the environment, as essential assets of the urban community. Organised into three distinctive parts, the book adopts a holistic perspective of urbanisation, with contributors from diverse backgrounds, ranging from government, academia, and NGOs. While capturing the current trends of urbanisation in general, it deals with inclusivity, livability and sustainability in particular. Due to its embrace of a wide spectrum of urban issues from the point of view of academics, researchers, technocrats, private sector and government officials, this book is truly unique. Across twenty chapters, the book not only encompasses the challenges of urban governance, but also provides insights on different innovations undertaken to address them in the best possible way. Undoubtedly, Cities: Inclusive, Liveable, and Sustainable is a vital resource for students and research scholars of urban management and administration, as well as for professionals working in the field.

Emerging Technologies for Sustainability P.C Thomas 2020-08-14 The theme of conference is Emerging Technologies for Sustainability. Sustainability tends to be problem driven and oriented towards guiding decision making. The goal is to raise the global standard of living without increasing the use of resources beyond global sustainable levels. The

conference is intended to act as a platform for researchers to share and gain knowledge, showcase their research findings and propose new solutions in policy formulation, design, processing and application of green materials, material selection, analysis, green manufacturing, testing and synthesis, thereby contributing to the creation of a more sustainable world.

Modernization and Accountability in the Social Economy Sector Ferreira, Augusta 2019-05-31 The social economy sector (SES) faces pressures for greater accountability to their funders, users, and citizens, and a growing need to report good practices in the social, economic, and financial impact that they have on the community. However, these entities often face difficulties related to the lack of an accounting framework that allows them to properly disseminate the results of their activities. Thus, practices that involve financial reporting and an assessment of their social, economic, and financial impact are needed to improve their accountability, sustainability, and operational performance. Modernization and Accountability in the Social Economy Sector is an essential reference source that discusses future avenues of development for the management of SES entities, accounting, control in SES management, and measures of performance in the SES. Featuring research on topics such as online communication, social accounting, and value reporting, this book is ideal for managers, financial consultants, academicians, researchers, and students interested in accounting, management, internal control, auditing, and technology use in the SES.
