Echo Dot 4th Generation User Manual Bryan Bent 2021-08-12 As the 19th century philosophical saying goes, all truth passes through three stages. First, it is ridiculed. Second, it is opposed. Third, it is accepted. When the parent company abandoned its puck-shaped Echo Dot last year and served up a spherical design, comment threads on various forums erupted in laughter. Amazon isn't the first to consider a spherical audio solution, of course. The third- and fourth-gen Dots boast the same circumference at their widest, but the new variant is almost twice as tall and more imposing than its predecessor - think grapefruit rather than stack of coffee coasters. The four physical buttons for mic on/off, action and volume are still present, offset from the apex of the Dot, and there's also a 'tap to snooze' feature, which is helpful if you use your Dot for alarms and reminders. One notable thing about the new design is the elliptical band of plastic that rises to its highest around the power port at the back of the unit; it means you shouldn't expect the same omnidirectional sound presentation as in the previous iteration. Inside is a new chip, which promises to make Alexa's response times up to twice as fast. In our tests, the newer Dot does respond quicker. The fourth-gen Echo Dot also enters a new low power mode when idle to save on energy consumption. Ready to explore new features and know your device better? Echo Show 10 3rd Generation User Manual Bryan Bent 2021-08-12 The Echo Show has always struggled with a mild identity crisis. Until now, it's been easy to write it off as an "An Echo with a screen," even though new models in different sizes have appeared over the last couple

of years. But the company has taken a big leap forward with the third-generation Echo Show 10. Its fresh design, and the manufacturing company's continued focus on improving the overall user experience has made this smart speaker feel fresh, and differentiate itself in a crowded field. The first thing you'll notice about the Echo Show 10 (3rd Gen) is its new design. The 10-inch HD screen is attached to a base that looks like a smaller version of its Echo Studio speaker. This new look feels modern, and elevates the screen off the ground, which makes it easier to see while moving. This feature is enabled by the Echo Show's 13 megapixel camera, which can track your movements and turn the smart speaker toward you. Ready to explore new features and know your device better?
