Crafting Ethnography Paul Atkinson 2022-02-23 This final book in Paul Atkinson's celebrated quartet on ethnographic research investigates material culture and its relationship to sensory ethnography. Building on the author's recent fieldwork, the book showcases how materials, techniques, tools and perspectives combine with the five senses to inform ethnographic methods. Filled with images and hands-on examples of encounters with crafts and craft workers, the book takes you on a sensory journey through glassblowing, woodworking, silversmithing, photography, life drawing, and perfume blending. These fieldwork snapshots provide insight into the ethnography of knowledge, skill, and craft. Helping to inform more reflective fieldwork, this book explores how analytical perspective varies based on the researcher and their physical environment. If you are looking to hone or expand your ethnographic practice, Paul shows you the exciting possibilities and implications of applying ethnographic methods to new contexts and media.

**Rodent model organisms: Therapeutic treatments and drugs interaction with the gut microbiome** Eugenia Bezirtzoglou

2025-04-16 The microbiome plays an indispensable role in our health. Pathophysiological alteration in the gut microbiota has been linked with the development and maintenance of non-communicable diseases, such as obesity, cancer, type 2 diabetes mellitus, cardiovascular diseases, and metabolic syndrome. Therapeutic treatments (such as employing folic acid and zinc for hyperuricemia treatment) and drugs (such as antibiotics) have been shown to modify the gut microbiota. At the same time, intestinal microbiota has been confirmed to influence the

pharmacokinetic processes of a variety of oral drugs (such as cyclosporine): manipulating the composition of the microbiome is a very attractive way of improving drug efficacy and safety, since gut microbiota affects absorption, enterohepatic recycling, volume of distribution, metabolism and excretion of drugs. Also complementary alternative traditional treatments (ex. Electroacupuncture, Tuina) and drugs (ex. root extracts such as *Gynura segetum* or *Scrophulariae Radix-Atractylodes sinensis*) has been shown to have important impact and correlation with the gut microbiota, which has been demonstrated to modulate many extraintestinal organ diseases. Although a considerable number of studies have focused on these interactions, there is still a lack of research on the mechanisms of correlation of all the above with the dysbiosis of the gut microbiota.
