Burnt by Democracy Jacqueline Kennelly 2023-11-30 *Burnt by Democracy* traces the political ascendance of neoliberalism and its effects on youth. The book explores democracy and citizenship as described in interviews with over forty young people – ages 16 to 30 – who have either experienced homelessness or identify as an activist, living in five liberal democracies: Canada, Australia, New Zealand, the United States, and the United Kingdom. Highlighting significant cuts to social and affordable housing, astronomical increases in the costs of higher education, and the transformation and erosion of state benefits systems, Jacqueline Kennelly argues that democracy's decline is not occurring because young people are apathetic, or focused on informal politics, or unaware of their civic duties. Rather, it is because of collective misunderstanding about how democracy is actually structured, how individuals learn to participate, and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions. Against a vivid and often heart-breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever-expanding state retrenchment and inequality, *Burnt by Democracy* makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing field for all.

Industrial Development Report United Nations Publications
2016-01-14 This report looks at how technology and innovation achieves inclusive and sustainable industrial development (ISID). Its main finding is that ISID is feasible and technology can simultaneously serve all three

dimensions of sustainability, including economic, social and environmental. Rapid inclusive and sustainable industrialization can happen more frequently provided that policymakers firmly steer the industrialization process with opportune policies and avoid past mistakes. In some cases, the spread of technology has not materialized in concrete growth opportunities because of the lack of technological capabilities. Innovation needs to be supported by interventions strengthening the process from invention to adoption, as capabilities are developed and high tech manufacturing sectors are created, seeing higher rates of sustainable growth.

Business, Organized Labour and Climate Policy Peter Glynn
2017-04-28 This impartial study analyses the role of employer's organisations and trade unions in climate change policy and its impacts on the labour market. The policies of government to manage greenhouse gas emissions will require business to change its product and service delivery arrangements, which in turn means labour requirements will also change. The book also considers whether labour market issues should be explicit in the theoretical framework of ecological modernisation as it guides the policy development process.
