Human Resource Management in Construction Projects Martin Loosemore 2003-12-08

Although construction is one of the most labour-intensive industries, people management issues are given inadequate attention. Furthermore, the focus of attention with regards to HR has been on the strategic aspects of HRM function - yet most problems and operational issues arise on projects. To help redress these problems, this book takes a broad view of HRM, examining the strategic and operational aspects of managing people within the construction sector. The book is aimed at project managers and students of project management who, until now, have been handed the responsibility for human resource management without adequate knowledge or training. The issues addressed

in this book are internationally relevant, and are of fundamental concern to both students and practitioners involved in the management of construction projects. The text draws on the authors' experience of working with a range of large construction companies in improving their HRM operational activities at both strategic and operational levels, and is well illustrated with case studies of projects and organizations.

particularly the Project Management Process, and the Project Management Plan.

Human Resource Management in the Project-Oriented Organization

Martina Huemann 2016-03-03 Organizations regularly assume that the culture, values, dynamic and organization of their temporary project organizations are merely a smaller version of the original parent. Given that project organizations are made up of people and teams drawn, in most cases, from outside and inside the parent, these assumptions are nonsensical.

But they do explain why the HR function finds it difficult to adapt to the project environment. Martina Huemann's research in Human Resource Management in the Project-Oriented Organization, offers insight into an approach that is designed to align HR to the needs of the project organization, in terms of management structure, reward, recruitment and performance systems. The text analyses how the modern HR organization stacks up alongside the temporary organization that is the project, to identify the HR constraints and needs of the project organisation and offer a model of project-oriented HRM. Professor Huemann had a deep interest in how and why change processes come into existence and how to design and enable them. In her book she endeavors to bridge theory and practice, strategy and operations.
