Rhetor Response Peter H. Khost 2018-09-10 Bridging the disciplinary divide between writing and literature, Rhetor Response introduces the concept and pedagogical applications of “literary affordances”—the ways in which readers “use” and integrate literature into their own writing or lives. Unconcerned with authorial intent, interpretive meaning, or critical reception, “affordance” signifies a shift in focus from what literary texts mean and do to what one can do with them. This book presents both opportunities and challenges to writing studies, a field whose burgeoning disciplinary independence ironically relies on a sizable underclass of specialists in literature rather than writing. Incorporating elements of rhetorical

theory, literary criticism, pedagogical methodology, political critique, and psychological and philosophical memoir, Peter H. Khost complicates and revives the relevance of literature—from belles lettres to fanfiction—by turning from interpretation to affordance in order to identify readers’ applications of literary textual features to unrelated lived situations. Rhetor Response theorizes and exemplifies literary affordance as a constructive step toward professional reconciliation, as well as an entry into greater textual power and pleasure for students and readers. It is a one-of-a-kind resource for college writing program administrators, faculty and scholars in English and writing studies, and graduate and advanced undergraduate students across both disciplines.

Both volumes represents a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed.
