Study Abroad 2006-2007 Unesco 2006 Study Abroad 2006-2007 contains some 2,900 entries concerning post-secondary education and training in all academic and professional fields in countries throughout the world. Key features include information on: Study opportunities and financial assistance available to students wishing to study in a foreign country; National systems of higher education; Open and distance learning (ODL) opportunities; Validation of foreign qualifications; How to search for quality institutions of higher education including warnings about bogus institutions. This is a trilingual edition: French/English/Spanish.

Study Opportunities at Universities and Possible Initial Occupations, 1990/1991 Joan Roodt 1990 This guide contains indexed lists of study opportunities in South African universities that relate to occupations that might be open to persons with various degrees, diplomas or certificates. In the first of two sections in the guide, opportunities for study and employment related to "first qualifications" are listed as follows: index of fields of study for which study opportunities are available; particular degree programs by field of study; index of occupations available to those with first qualifications; index of institutions offering programs of study. The second section of the guide concerns "advanced qualifications" and arranges entries as follows: field of study for which advanced degrees are available; actual degree programs at particular institutions; index of institutions offering advanced degrees. For both sections the descriptions of actual degree programs at particular institutions list the name of the institution, the language medium (English or Afrikaans), the duration of the program, the entry qualifications, subjects required, the admissions criteria; and the application deadline; the descriptions in the first section also list the possible occupations for those completing the program. An appendix provides the addresses of institutions mentioned in the guide. (JB)

Information Resources in Toxicology, Volume 2: The Global Arena 2020-05-15 This new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represents a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena

offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, -omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. - Opens with an overview of the international toxicology scene, organizations and activities involved with both the science and regulatory framework, and a specific look at the European Union's efforts - Offers an extensive collection of chapters covering over 40 countries and their toxicological infrastructure which includes listings of major books and journals, organizations, professional societies, universities, poison control centers, legislation, and online databases - Provides the Second Edition of the International Union of Pure and Applied Chemistry's Glossary of Terms Used in Toxicology, a carefully constructed and peer reviewed collation of critical terms in the science - Concludes with a potpourri of quotes concerning toxicology and their use in the arts and popular culture - Paired with Volume One, which offers chapters on a host of toxicology sub-disciplines, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field
