**Computerized Assessment**

Fritz Drasgow 1999-03-01

Computerized assessment

offers many opportunities for

innovations in measurement. In

contrast to static paper-and-

pencil instruments,

computerized assessment can

capitalize on the dynamic

capabilities of the computer.

For example, the difficulty of

administered items can be

adopted to the ability of the

examinee, thus eliminating

items that are too hard or too

easy. Multimedia computers

provide the opportunity to

revolutionize assessment.

Stereo sound, animation, and full-motion video can be incorporated into assessment tools and aid in the measurement of individual differences ranging from musical skills to interpersonal abilities. Innovations in Computerized Assessment presents the experiences of leading researchers in computerized assessment. The book places particular emphasis on the dilemmas that were faced by the researchers. Questions addressed include: \* What problems did they confront? \* What were the pros and cons of various options? \* How were dilemmas resolved? \* Were the solutions good ones?

*Resources in Education* 1996  
**Educational Assessment in a Changing World** Isabel Nisbet  
 2024-10-21 This timely book takes stock of the wide range of developments in society, education and assessment and offers conclusions and strategies that are necessary for the future of educational assessment. Drawing on examples from the UK, Europe

and USA, the book will dissect cultural, political, psychological and ideological ideas on society, education and assessment and foreground pressing issues relating to artificial intelligence, social justice and climate change. Acknowledging its predominantly Western perspective and providing context on the evolution of educational assessment, the book will bridge the gap between theory and practice to progress debate and discourse on creating a culture of assessment fit for the future and rethinking strategies for the path ahead. Ultimately, the book will provide insights and key takeaways for the field of educational assessment along with an evidence-based agenda that will be relevant for education professionals, the assessment industry and policymakers interested in higher education, international and comparative education and testing.
