[How to Build a Kit Bike](#) Jonathan Wood 2002-10 Scratch built motorcycles remain very popular. In order to simplify the process, many companies in the American V-twin aftermarket are selling kits. Three of these companies, Custom Chrome, Arlen Ness and Biker1s Choice, have excellent programs. All offer very complete kits that allow the builder to assemble a complete motorcycle without any additional purchases. All that's missing is labor and paint. The book will document, with detailed photos and copy, the assembly from beginning to end, of three motorcycles from the firms mentioned above. Because of the technical nature of this book, there will be more images and less copy than in other Wolfgang Publication books. Each sequence will be illustrated by at least 200 images. Approximately 60% of these images will be in color. This book will also contain side-bars on tools and basic assembly techniques, all designed to aid the first time builder.

**How to Build a West Coast Chopper Kit Bike** Mike Seate This book presents a step-by-step guide to building a West Coast Chopper's C.F.L. kit. Kit choppers are hot commodities. While few people can afford to buy a custom-built chopper from one of the high-end builders like Jesse James-bikes that often sell for \$100,000 or more-many can afford to buy such bikes in kit form. Because of this, all the high-end builders sell their creations in kit form. For example, while Jesse James might build perhaps a dozen custom bikes per year, he sells hundreds of chopper kits. The same is true of any number of other builders like Matt Hotch, Cyril Huze, and Paul Yaffe. Authored by Mike Seate and featuring the photography of Joe Appel, this book is a step-by-step how-to guide for anyone building a kit chopper.
