Children Reading Pictures Evelyn Arizpe 2004-08-02 This book describes the fascinating results of a two year study of children's responses to contemporary picturebooks. Children of primary school age, from a range of backgrounds, read and discussed books by the award-winning artists, Anthony Browne and Satoshi Kitamura. They then made their own drawings in response to the books. The authors found that children are sophisticated readers of visual texts, and are able to make sense of complex images on literal, visual and metaphorical levels. They are able to understand different viewpoints, analyse moods, messages and emotions, and articulate personal responses to picturebooks - even when they struggle with the written word. With colour illustrations, and interviews with the two authors whose books were included in the study, this book demonstrates how important visual literacy is to children's understanding and development. Primary and Early Years teachers, literacy co-ordinators and all those interested in children's literature will find this a captivating read.

Looking at Picture Books John W. Stewig 1995 A valuable resource for anyone wishing to understand the relationship between art and text! This clearly written review of art and design principals provides background information and aids in the evaluation of art in picture books. Extensively illustrated with color and black & white illustrations from many award-winning and notable children's books, the author defines each of the pictorial elements used, such as line, shape, space, color and texture, and addresses compositional components such as balance, rhythm and unity. Also identifies the role of the medium the artist selects, critical elements of book design and the influence of the major art movements in children's book illustration. Includes annotated bibliographies, author/illustrator and title/subject indexes and a summary of picture book genres.

Children's Catalog H.W. Wilson Company 1917 The 1st ed. includes an index to v. 28-36 of St. Nicholas.
