Reading Strategies for Elementary Students With Learning Difficulties William N. Bender 2009-01-12 Packed with research-based strategies for use with RTI, this resource covers brain-compatible reading instruction for students with learning disabilities or reading difficulties.

Child Neuropsychology John E. Obrzut 2013-09-24 *Child Neuropsychology, Volume 2: Clinical Practice* attempts to bridge the gap between neurodevelopmental theory and clinical practice with a pediatric population. The focus is on some of the more common neuropsychological disorders encountered in children, along with neuropsychological evaluation, intervention, and treatment. Comprised of 11 chapters, this volume begins with an overview of issues and perspectives in clinical child neuropsychology, followed by a

discussion on neurodevelopmental learning disorders in children. The neuropsychological basis of psychiatric disorders in children are then examined, together with epilepsy and closed-head injury as well as different approaches and issues relevant to neuropsychological evaluation of children. Subsequent chapters deal with the importance of soft signs and neuropsychological screening; neuropsychological assessment of children; actuarial and clinical assessment practices; and intervention and treatment. The book also presents an overview of how one might conceptualize and integrate differential diagnosis of neurodevelopmental learning disabilities with appropriate curriculum-based intervention strategies. The final chapter considers the broader applications of behavioral neuropsychology.

This book is relevant to clinical child or pediatric neuropsychologists, child or school psychologists, physicians interested in pediatric neuropsychological disorders, and other professionals who provide services to children with neurologically based disorders. It may also serve as a reference for audiologists, speech and language therapists, or educators.

Building Independence

Christine E. Reeve 2012-10-15
Building Independence: How to Create and Use Structured Work Systems presents an evidence-based approach to structured work systems. Individuals with autism and related disorders are supported by a variety of people throughout their day, whether in educational and work settings, transition programs, or at home. Structured work systems are one method that can be used to ensure that they develop and maintain their

ability to work on their own without assistance and prompting from others. The characteristics and benefits of structured work systems are explained in this well-illustrated book. Structured work systems provide visual information about what work needs to be done, how much work needs to be done, when the work is completed, and what will happen next. Due to the predictability and sense of accomplishment that is built into the system, many individuals with autism find that structured work time is their favorite time of the day. Full of colorful photos and case examples spanning different ages and levels of functioning, the book provides an A-Z guide to work systems, including assessment, how to build them into the curriculum, IEPs, lesson planning, and more tools geared toward individuals with autism and related differences. Foreword by Gary Mesibov, PhD.

teaching students with mild disabilities and students at risk for school failure. Also for courses in teaching students with disabilities in inclusive and Special Education settings. This top-selling practical, research-based text contains the resources teachers need to make informed decisions concerning their students with learning or behavior problems, making it the most useful methods text on the market. Prided for its unique and comprehensive coverage of classroom assessment and methods for the content areas, it assists teachers in finding effective practices to facilitate instruction of students with learning problems.

Instruction of Students with Severe Disabilities Martha E. Snell 2000 For courses in Severe/Multiple Disabilities Methods. This highly successful text addresses the full range of curriculum topics involved in educating individuals with severe disabilities. Clear descriptions and explanations of best practices, time-proven

techniques, and a strong theory/research base combine to create one of the most comprehensive texts of its kind. Its focus on meaningful inclusion of students with disabilities and their non-disabled peers make this book an ideal main text for courses in severe disabilities.

Adaptive Behavior Assessment System-II

Thomas Oakland 2011-10-10
Adaptive Behavior Assessment System-II summarizes information on adaptive behavior and skills as well as general issues in adaptive behavior assessment with the goal of promoting sound assessment practice during uses, interpretations, and applications of the Adaptive Behavior Assessment System-II. Adaptive behavior and skills refer to personal qualities associated with the ability to meet one's personal needs such as communication, self-care, socialization, etc. and those of others. Data from measures of adaptive behavior have been used most commonly in assessment and intervention services for persons with mental retardation. However, the display of adaptive behaviors and skills is relevant to all persons. The Adaptive Behavior Assessment System-II

(ABAS-II) provides a comprehensive, norm-referenced assessment of the adaptive behavior and skills of individuals from birth through age 89. The comprehensive nature of the ABAS-II, ease in administration and scoring, and wide age range have resulted in its widespread use for a large number of assessment purposes. The book provides practical information and thus serves as a valuable resource for those who use the ABAS-II. - Assists in the functional use of the ABAS-II - Provides case studies illustrating use of the ABAS-II in comprehensive assessment and intervention planning - Reviews scholarship on adaptive behaviors and skills - Describes legal, ethical, and other professional standards and guidelines that apply to the use of the ABAS-II and other measures of adaptive behavior - Discusses the use of the ABAS-II with autism, mental retardation; young children and those in elementary and secondary school; as well as incarcerated persons being

evaluated for possible mental retardation

Making Inclusion Work for Students with Autism Spectrum Disorders Tristram Smith 2011-11-15 An indispensable resource for K-12 educators and autism specialists, this highly practical book shows how to include students with autism spectrum disorders (ASD) in general education settings. Tristram Smith and his associates present a research-based, step-by-step process for assessing students at a range of skill levels, planning and implementing successful inclusion programs, and working as a team with other professionals and with parents. The book is packed with specific strategies for helping students with ASD follow the daily routine, learn from the general education curriculum, interact with peers, and overcome problem behavior. In a large-size format for easy photocopying, it features dozens of reproducible worksheets and forms.

School-age Education Programs for Children with Autism

Jan S. Handleman 2006 Handleman (psychology and Douglass Developmental Disabilities Center, Rutgers U.) and Harris (clinical psychology and Douglass Developmental Disabilities Center, Rutgers U.) compile 12 essays that examine educational services for autistic children that are public, private, or university-based. Contributors discuss their programs in New Jersey, New York, Delaware, North Carolina, and Pennsylvania in urban, suburban, and rural areas. Each contributor describes diagnosis and assessment, staffing and administration, curriculum, integration, methods, family involvement, school transitions, and outcome. The last two chapters address special issues in graduating from preschool in addition to moving to adulthood. There is no index. Handleman and Harris are the authors of *Preschool Education Programs for Children with Autism*. Annotation :2006 Book News, Inc., Portland, OR
