Leaving Certificate Higher Maths Solutions 2018/2019 Joe McCormack 2018-12-30 These books contain clear and comprehensive solutions to the Leaving Certificate Higher Exam Paper Questions for the last four years (2018, 2017, 2016 and 2015). The 2014, 2013 and 2012 solutions are also available to download and view on any device and can be added to your cart at checkout later if you wish. The unique handwritten solutions are easy to understand for the weaker student but will also provide the high flyer with the skills to hit the "H1" grade. There is one hundred and forty four pages of the best notes in each book making it a competitive production at this price point. Each book contains the most detailed solutions of any Maths book on the market in Ireland and sets out every single line of the solution (step by step) with notes explaining the Maths behind them. The solutions encompass all topics on the course including Algebra, Calculus, Financial Maths, Complex Numbers, Geometry, Probability, Statistics, Trigonometry etc.. They also give an insight into the marking scheme of each paper. Students who regularly use these books negate the need to spend hundreds of Euro's on tuition, as many parents have commented to me over the years. Students can easily follow the stepped solutions on their own and subsequently learn how to apply it to a similar styled exam question later. The most efficient way for a student to use the book is to try each question part for themselves first and then subsequently refer to my solution to see where they have gone right or wrong; hence the student is always 'learning by doing'. Higher Education in Austerity Europe Jon Nixon 2017-09-21 The financial crisis of 2007/2008 prompted governments across Europe to adopt austerity measures aimed at the reduction of their escalating budget deficits. Higher Education in Austerity Europe explores how the resulting cuts in public expenditure - together with the increasing reliance on the privatisation of services - have impacted on higher education directly through the reduction of public sector provision and indirectly as a result of the social and political consequences of that reduction. Moreover, it explores how the effects of these economic policies have differed markedly across the national regions of Europe, with the result that inequality has increased significantly both within and between national regions, and this, in turn, has led to social and political dislocation within and across communities. It is only by viewing higher education within this broader context that we can begin to understand the full implications of the austerity measures introduced over the last ten years. Jon Nixon draws together leading scholars to delve into the complexity of impact and response generated by these measures. Part 1 focuses on cross-European perspectives; Part 2 on the impact of austerity measures within national systems; and Part 3 on new perspectives and possibilities. The volume also includes considered responses from 'outsiders' by academics located in Asia, Australia, and the USA, providing an additional dimension to the analysis. As well as analysing the full impact of austerity measures across some of the worst hit national regions of Europe, the contributors also identifying openings and possibilities for renewal.

Massive Open Online Courses and Higher Education Rebecca Bennett 2017-04-21 Since the first MOOC was launched at the University of Manitoba in 2008, this new form of the massification of higher

education has been a rollercoaster ride for the university sector. The New York Times famously declared 2012 to be the year of the MOOC. However, by 2014, the number of academic leaders who believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.
