**Curricula for Students with Severe Disabilities** Phyllis Jones

2017-03-16 Students with severe disabilities comprise 2 percent of the population of learners who are impacted by intellectual, communicative, social, emotional, physical, sensory and medical issues. Increasingly, however, teachers are required to meet the challenges of creating a pedagogical balance between an individual student's strengths, needs and preferences, and core academic curricula. The need to embrace the current initiative of curriculum state standards in the debate of curricula relevance, breadth, balance and depth for students with severe disabilities is not just timely—it contributes to the evolving debate of what constitutes an appropriate curriculum for severely disabled learners. *Curricula for Students with Severe Disabilities* supports the development of greater understandings of the role that state curriculum standards play in the pedagogical decision-making for students with severe intellectual disabilities. The book first discusses the nature and needs of these students, the curriculum for this group of learners and the recent contributions of state curriculum standards, before presenting narratives of real classrooms, teachers and students who have meaningfully integrated state curriculum standards at the kindergarten, elementary and high school levels.

**Creative Activities for Young Children** Mary Mayesky 2006 In this very special book, teachers, parents and care givers will be exposed to hundreds of age-appropriate activities for young children through grade 5?all aimed at promoting creativity through art activities across the curriculum. The author presents a wealth of information about developing creativity in children and in their adult educators with such activities as art and food recipes, finger plays, and poems and through the use of such resources as book and software lists, advice for choosing children's books, hundreds of resource Web sites and much more. Readers will appreciate the sound theoretical base presented for the hundreds of practical activities designed to encourage creativity in children and their educators. ?This One's for You? and ?Think About It? sections make the text more interesting by expanding coverage to related, thought-provoking research in early childhood education. This book is a must have for those looking to bring creativity to young children in a very engaging way.

**Common Core Standards for Elementary Grades K-2 Math & English Language Arts** Amber Evenson 2013-05-20 Smart

implementation of the Common Core State Standards requires both an overall understanding of the standards and a grasp of their implications for planning, teaching, and learning. This Quick-Start Guide provides a succinct, all-in-one look at \* The content, structure, terminology, and emphases of the Common Core standards for mathematics and English language arts and literacy in the lower elementary grades. \* The meaning of the individual standards within each of the four ELA/literacy strands and five math domains, with an emphasis on areas that represent the most significant changes to business as usual. \* How the standards connect across and within strands, domains, and grade levels to develop the foundational language arts, literacy, and mathematics understanding that will support a lifetime of successful learning. Here, teachers of grades K-2 and elementary school leaders will find information they need to begin adapting their practices to help all students master the new and challenging material contained in the standards. A practical lesson

planning process to use with the Common Core, based on Classroom Instruction That Works, 2nd Ed., is included, along with six sample lessons. LEARN THE ESSENTIALS OF THE COMMON CORE The grade-level and subject-specific Quick-Start Guides in the Understanding the Common Core Standards series, edited by John Kendall, are designed to help school leaders and school staffs turn Common Core standards into coherent, content-rich curriculum and effective, classroom-level lessons. **Aviation Week & Space Technology** 1921 Includes a mid-December issue called Buyer guide edition.

*Readings in Educational Supervision* Ray E. Bruce 1987 This collection of readings (mostly from "Educational Leadership") is directed to leaders in educational settings who are responsible for curriculum development, professional growth, and improving instruction. The selections are organized under eight topics: (1) history, nature, and purposes of educational supervision; (2) organization for supervisory services; (3) human skills in supervision; (4) supervisory techniques for planning and managing educational programs; (5) the supervisor as facilitator in the improvement of teaching and learning; (6) the supervisor as leader in curriculum development; (7) the supervisor as a leader in staff development; and (8) the supervisor as a researcher and member of the profession. For each of these major topics, an overview introduces selected readings. The overview establishes the contribution and relationship of that topic to educational supervision and provides questions in order to direct the reader to the interaction between the articles. There is also a "Guide for Readers," designed to aid instructors and students. In the form of a matrix, the guide lists nine major textbooks in the field of educational supervision and shows the intersection with the articles in this collection. Resources are included in each separate article. (LMS)
