Making Inclusion Work Frank Bowe 2005 For the Inclusion/Mainstreaming course. Born of the author's extensive experience in preparing teachers, this accessible, categorical inclusion text offers a practical perspective on inclusion in today's multicultural, multilingual, and broadly diverse classrooms. The author offers this perspective while simultaneously challenging pre-service and in-service teachers with a relatively new way of thinking about teaching: universal design in education. A thorough

discussion of the foundations of inclusion and of the law at the beginning of the text is followed by specific disability chapters, methods chapters, and content area chapters. Each of the chapters (except for the foundational chapters in Part I) contain practical strategies and methods for the preservice teacher in all age groups.

Basic Composition Skills for Engineering Technicians and Technologists David W. Rigby 2000-11 Very friendly, very practical, and very industry oriented, this manual helps engineering technicians and technologists upgrade fundamental skills in writing by focusing on the problems that are encountered by writers and the solutions to those problems. Viewing technical writing as "constructed/engineered" writing, it shows how technical writing is really technical composing that combines text as well as visual (graphic) and mathematical conceptualizations. Provides many writing samples and models that were developed for genuine applications in company settings. The down-to-earth, accessible style and how-to-do-it approach features a crisp corporate seminar-style presentation that gets to the point quickly and stays focused on topics and situations that are clearly relevant and immediately applicable. (Part of The Wordworks Series--a series of four communication skills manuals--three writers' guides for engineering and technical applications and an additional guide to in-service spoken communication.) Finding the Starting Line; Thinking and Speaking; The Way We Write; False Starts; Project Preparation; The Main Event; Fundamental Project Architecture; Compound Architectures; Outline Controls; Paragraph Logic; Memoranda; Business Letters; Laboratory Reports; Bids, Estimates and Proposals. For engineering technicians and technologists in a variety of fields--e.g., computer information systems, construction engineering, biomedical equipment technology, digital electronics, autocad, environmental control technology, microcomputer management, biotech, avionics, and many more. *A Developmental Approach Investigating Differences in the Way High School Students of Varying Performance Levels Conceptualize Academic Essay Writing* Loretta Sue Kane 2005
