Writing the College Essay James D. Zamagias 1996

Teaching Ritual Catherine Bell 2007-05-11 There is a great deal of interest in bringing a better appreciation of ritual into religious studies classes, but many teachers are uncertain how to go about doing this. Religious studies faculty know how to teach texts, but they are often unprepared to teach something for which the meaning lies in the doing. How much doing should a class do? How does the teacher talk about religious concepts that exist in practical relationships, not textual descriptions? These practical issues also give rise to theoretical questions. Giving more attention to ritual effectively suggests a reinterpretation of religion itself focused on what people have thought and written, and more focused on how they order their universe. Much of the useful analysis of ritual derives from anthropological and sociological premises, which are often foreign to religious studies faculty and are seen by some as theologically problematic. This is the first resource to address the issues specific to teaching this subject. A stellar cast of contributors, who teach ritual in a wide variety of courses and settings, explain what has worked for them in the classroom, what hasn't, and what they've learned from experience. Their voices range from personal to formal, and their topics from Japanese theatre to using field trips. The result is a thoughtful guide for teachers who are new to the subject as well as experienced ones looking for fresh angles and approaches.

Language Acquisition and Academic Writing James D. Williams

2022-11-23 An important contribution to the scholarship on student writing and composition theory, this book presents a new approach to writing instruction based on linguistic research and theory. In this book, leading scholar James D. Williams explores the historical failures of composition studies and the need for effective writing instruction to be grounded in the immersive principles of language acquisition. Starting with an indictment of the historical failures of composition studies to teach students how to become competent writers, the book moves beyond the current flawed theories and practices to introduce a new way forward to improving students' writing skills. Accessible and jargon-free, Williams skillfully explains how students must be immersed in target dialects and registers, with access to a range of authentic texts, to become effective writers of academic discourse. Chapters include authentic writing samples from the disciplines, including life and applied sciences, social sciences, and humanities. Essential for preservice and practicing teachers of writing, as well as scholars in composition and literacy studies, the book demonstrates how language acquisition is a necessary foundation and provides a road map to improving students' writing proficiency.
