Environmental Assessment of Projects (in Russian) Alexandre Chaikine (Шайкин А.Б.)

Представлены современные тенденции развития методологии экологических оценок проектов. Оценки эффектов проводятся с использованием новых для отечественной практики понятий, таких как: значимые компоненты, индикаторы, измеряемые параметры, пороговые значения, региональные и локальные области оценки. Знание характеристик эффекта - величины, географического размаха, продолжительности, обратимости и периодичности позволяет обоснованно судить о его существенности. Этот методический подход дает возможность последовательно представить результаты проведения оценки, сделать ЭО более логичной и понятной неспециалистам. ЭО обсуждаются на основе материалов проектов, сделанных как в России, так и за рубежом, начиная с 90-х гг. приведены примеры природоохранных мероприятий и методы проведения оценок. Отдельная глава посвящена особенностям ЭО, которые проводятся международными финансовыми организациями. Книга предназначена для практикующих экологов, специалистов по охране окружающей среды и может быть полезна студентам соответствующих специальностей и всем, кто интересуется проблемами окружающей среды. Материалы этой книги были положены в основу практического курса по управлению окружающей средой.

Exporters' Encyclopaedia 1987 Material is arranged geographically. For each country there is a country profile followed by information on marketing data, communications, transportation, business travel, key contacts, and a summary trade regulations and documentation required. Also included are brief sections on U.S. ports, U.S. foreign trade zones, World Trade Center Association members, U.S. government agencies

providing assistance to exporters, foreign trade organizations, foreign communications, and general exports and shipping information and practice.

The Report: Abu Dhabi 2015 Oxford Business Group 2016-05-09 Hydrocarbons revenues still form the bulk of Abu Dhabi's GDP and while falling prices are a concern, the emirate has been moving steadily towards its economic diversification targets in line with Abu Dhabi Economic Vision 2030. The past 10 years has seen the non-oil sector expand strongly on the back of business-friendly government policies, as a result of which non-oil sector growth now outpaces that of the oil sector. Outside of hydrocarbons, construction and manufacturing represent the biggest GDP contributors in the emirate, with the construction sector poised to enter a period of renewed expansion and manufacturing identified as a key area for future growth, leveraging the emirate's natural resources, growing downstream capabilities and strategic location. Elsewhere Abu Dhabi's financial sector continues to assert itself and the expected 2015 launch of Abu Dhabi Global Market, the UAE's second financial free zone, is expected to boost activity in the sector. Meanwhile visitor numbers to Abu Dhabi continue to rise, with around 3.5m arrivals in 2014, up 25% on the previous year. This growth is expected to continue as major infrastructure upgrades continue apace. These include the expansion of Abu Dhabi International Airport and the development of the 1200-km wide Etihad rail project.

Handbook of Loss Prevention Engineering Joel

M. Haight 2013-03-19 Loss prevention engineering describes all activities intended to help organizations in any industry to prevent loss, whether it be through injury, fire, explosion, toxic release, natural disaster, terrorism or other security threats. Compared to

process safety, which only focusses on preventing loss in the process industry, this is a much broader field. Here is the only one-stop source for loss prevention principles, policies, practices, programs and methodology presented from an engineering vantage point. As such, this handbook discusses the engineering needs for manufacturing, construction, mining, defense, health care, transportation and quantification, covering the topics to a depth that allows for their functional use while providing additional references should more information be required. The reference nature of the book allows any engineers or other professionals in charge of safety concerns to find the information needed to complete their analysis, project, process, or design.

Managing Occupational Health and Safety Risks in High-hazard Industries: A Technical Business Guide Marcell Greeff 2023-06-30 Despite significant advancements made over the past century, the occurrence of serious injuries, work-related fatalities, and property loss remains a persistent global challenge in various high-hazard industries. The implementation of suitable risk management frameworks plays a vital role in mitigating risks to employees, facilities, and the surrounding environment. This book draws upon the extensive research conducted by Dr. Marcell Greeff during his tenure in the mining, marine, shipping, oil and gas, and construction industries. This book is a direct result of the thesis project he submitted in 2015 to obtain his Honours Degree in Business Management: Bachelor of Commerce (BCom), supported by his Master of Science (MSc) project for Risk Management in the mining industry in 2013. Dr. Greeff's professional experience spans multiple corporate, high-hazard workplaces, including deep level gold mining, open cast mining, construction (representing clients/agents as well as contractors), agriculture, shipping and logistics, deep ocean mining, vessel conversions and dry-docks, oil and gas, utilities (water and electricity), manufacturing, factories, and plants. Throughout his career, Dr. Greeff consistently

observed that organizations face challenges in designing appropriate risk management frameworks to support their safety management systems. As the appointed individual responsible for corporate occupational health and safety compliance and best practices, he has been directly involved in seven fatal injuries, representing his employer (high-hazard organizations) in civil court and presenting their corporate safety management system as evidence of risk management compliance. His wealth of experience is grounded in practical learnings, where theory is translated into practice to establish simple, easy-to-understand, and non-negotiable standards. Dr. Greeff's empirical research for his doctoral degree identified risk management as a critical indicator (component and requirement) of an organizational safety management system. This finding led him to include risk management in his Safety Culture Maturity Development Model, which he published in his book titled "The Empirical Design of a Safety Culture Maturity Development Model" (Greeff, 2023:219). During his research, Dr. Greeff validated that organizations either lack appropriate risk management frameworks or struggle to design them in compliance with applicable legal requirements. To bridge this gap, this book presents Dr. Greeff's research, wherein he critically evaluates risk management literature and applies it to real-world, practical examples, culminating in a comprehensive risk management framework tailored for high-hazard industries. In addition to being a valuable resource for professionals, this book serves as a technical business guide for students seeking to develop a unique and suitable risk management framework for high-hazard industries. By integrating the latest legal requirements with best practices, Dr. Greeff contributes to the body of knowledge and offers a practical approach to risk management in the high-hazard industry. The ultimate aim is to reduce the frequency of incidents and accidents, striving towards the goal of zero harm. By delving into the content of this book and carefully considering its recommendations, organisations can adopt the high-hazard risk management framework, either as it is proposed in figure 2, or can be guided towards the development of an effective in-house

risk management framework. The requirements for risk management as a safety culture indicator at every stage of the five stages of Safety Culture Maturity is illustrated in figure 24 while figure 25 details the actions to develop the maturity of risk management as an indicator of safety culture to reach stage 5, continuous improvement, which is the highest safety culture maturity.
