**The Importance of Wood and Timber in Sustainable Buildings** Ali Sayigh 2021-09-13 This book emphasizes the important message that architects and structural engineers must strive to ensure that the buildings they design and construct should not be major contributors to climate change. Rather, they should be exploring the use of green materials and building methods - such as timber, wood, and associated materials - in order to safeguard the environment. These sustainable materials are not only environmentally friendly, but they have the added benefit of being easy to manufacture, cost effective, often locally available, and easily replenished. Moreover, it has been demonstrated that wood and timber are viable materials in the construction of a wide variety of building types, including medium and high-rise buildings. The Importance of Wood and Timber in Sustainable Buildings brings together a distinguished group of contributors from different cultures and building traditions to address why now is the time to rethink our construction methods and explore replacing many of the carbon intensive materials that are currently being used with wood and timber.

**The Beginnings of Chinese Civilization** Chi Li 2020-11-19 This book presents a collection of archaeological and anthropological writings by Li Chi, the founding father of modern archaeology in China. It is divided into two parts, the first of which traces back the rise of Chinese civilization, as well as the origins of the Chinese people; in turn, the second part reviews the rise of archaeology in China as a scientific subject that combines fieldwork methods from the West with traditional antiquarian studies. Readers who are interested in Chinese civilization will find fascinating information on the excavations of Yin Hsü (the ruins of the Yin Dynasty), including building foundations, bronzes, chariots, pottery, stone and jade, and thousands of oracle bones, which are vividly shown in historical pictures. These findings transformed the Yin Shang culture from legend into history and thus moved China's history forward by hundreds of years, shocking the world. In turn, the articles on anthropology include Li Chi's reflections on central problems in Chinese anthropology and are both enlightening and thought-provoking.
