Differentiating Instruction With

Menus Laurie E. Westphal

2021-09-03 Differentiating

Instruction With Menus:

Chemistry offers teachers

everything needed to create a

student-centered learning

environment based on choice.

This book uses different types

of menus that students can use

to select exciting advanced-

level products that they will

develop so teachers can assess

what has been

learned—instead of using a

traditional worksheet format.

Topics addressed include

chemistry basics,

measurements, atoms,

chemical bonding and

reactions, gas laws, energy,

acids and bases, and nuclear

and organic chemistry.

Differentiating Instruction With

Menus: Chemistry contains

attractive reproducible menus,

each based on the levels of

Bloom's revised taxonomy as

well as incorporating different

learning styles. These menus

can be used to guide students

in making decisions as to which

products they will develop after

studying a major concept or unit. Grades 9-12
