Challenges to Legal Theory

María José Falcón y Tella 2021-01-18 Challenges to Legal

Theory offers the reader a fascinating journey through a variety of multi-disciplinary topics, ranging from law and literature, and law and religion, to legal philosophy and

constitutional law. The collection reflects some of the challenges that the field of legal theory currently faces. It is compiled by a selection of international and Spanish scholars, whose essays are made available in English translation for the first time.

The volume is based on a collection of essays, published in Spanish, in honour of Professor José Iturmendi Morales, of Complutense University, Madrid, and brings the rich scholarship of pre-eminent Spanish scholars of law and legal theory to an international audience.

Neutrosophic Sets and Systems, vol. 74/2024 {Special Issue: Advances in SuperHyperStructures and Applied Neutrosophic Theories} Florentin Smarandache 2024-12-16 This volume contains the proceedings of the conference held at the University of Guayaquil on November 28 and 29, 2024, featuring contributions from researchers representing Colombia, Cuba, Ecuador, Spain, the United States, Greece, Japan, Mexico,

and Peru. The conference focused on SuperHyperStructures and Applied Neutrosophic Theories, commemorating the 30th anniversary of neutrosophic theories and their extensive applications. The topic of SuperHyperStructures and Neutrosophic SuperHyperStructures explores advanced mathematical frameworks built on powersets of a set \square , extending to higher orders $\square\square(\square)$. SuperHyperStructures are constructed using all non-empty subsets of \square , while Neutrosophic SuperHyperStructures incorporate the empty set \square , representing indeterminacy. These structures model real-world systems where elements are organized hierarchically, from sets to sub-sets and beyond, enabling the analysis of complex and indeterminate relationships.
