Mechanisms Underpinning the Link between Emotion, Physical Health and Longevity

Andrew H. Kemp
2017-09-13 The 1990's was designated as 'the decade of the brain' and now, common mental disorders are described as 'brain disorders'. Yet intense research interest on the brain has largely side-lined the body

as a passive observer, disconnecting mental from physical health and contributing to further societal stigma on the nature of psychiatric illness and mental distress. The biopsychosocial pathway to premature mortality or longevity is a complex one, involving a host of closely intertwined mechanisms and moderating factors, some of which are investigated in this special issue. All the articles published here provide new insights into the pathways linking emotion, physical health and longevity, highlighting the tight linkage between mind, brain and body.

Improving Teaching, Learning, Equity, and Success in Gateway Courses

Andrew K. Koch 2018-01-22 As long as there have been U. S. colleges and universities, there have been entry courses that pose difficulties for students courses that have served more as weeding-out rather than gearing-up experiences for undergraduates. This volume makes the case that the weed-out dynamic is no longer acceptable if it ever was. Contemporary postsecondary education is characterized by vastly expanded access for historically underserved populations of students, and this new level of access is coupled with increased scrutiny of retention and graduation outcomes. Chapters in this volume define and explore issues in gateway

courses and provide various examples of how to improve teaching, learning and outcomes in these foundational components of the undergraduate experience. This is the 180th volume of the Jossey-Bass quarterly report series *New Directions for Higher Education*. Addressed to presidents, vice presidents, deans, and other higher education decision makers on all kinds of campuses, it provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

University English for Academic Purposes in China
Xiaofei Rao 2018-07-07
This book uses an in-depth, phenomenological interview approach to explain the

generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical

consciousness among the present and future university youths in a time of great social changes.
