The fourth section is the main part of the guide covering 650 species, including descriptions, photographs and range maps of each species. Peterson Reference Guide To Birding By Impression Kevin T. Karlson 2015-05-05 A highly visual guide to identifying birds in the field based on the important, unchanging features of size, shape, structure, and behavior Birding is an extremely rewarding and fun hobby, but some situations can be frustrating or unsuccessful because of a variety of challenging viewing conditions. This guide to identifying birds offers the holistic "birding by impression" method, which not only helps with these difficult conditions, but also develops an efficient mental identification process using left- and right-brain skills. It begins with a conscious assessment of a bird's unchanging physical characteristics, including general size, body shape, structural features (bill, legs, neck, and wings), and behavior. Using this approach, birders can quickly assess all birds and distinguish new and uncommon species from familiar ones. They can then examine more detailed field marks to fine-tune the identification. Rather than a traditional field guide, this book presents an interactive how-to approach to a more complete identification process.

With Sibley as your guide, learn how to interpret what the feathers, the anatomical structure, the sounds of a bird tell you. When you know the clues that show you why there's no such thing as, for example, "just a duck" birding will be more fun, and more meaningful. An essential addition to the Sibley shelf! *The Sibley Guide to Birds* and *The Sibley Guide to Bird Life and Behavior* are both universally acclaimed as the new standard source of species information. And now David Sibley, America's premier birder and best-known bird artist, turns his attention to the general characteristics that influence the appearance of all birds, unlocking the clues to their identity. In 200 beautifully rendered illustrations and 16 essays, this scientifically precise volume distills the essence of Sibley's own experience and skills, providing a solid introduction to "naming" the birds. *Birding Basics* reviews how one can get started as a birder—the

equipment necessary, where and when to go birding, and perhaps most important, the essential things to look for when birds appear in the field—as well as the basic concepts of bird identification and the variations that can change the appearance of a bird over time or in different settings. Sibley also provides critical information on the aspects of avian life that differ from species to species: feathers (color, arrangement, shape, molt), behavior and habitat, and sounds.
