**SAP BusinessObjects Dashboards 4.0 Cookbook** David Lai 2011-05-23 Over 90 simple and incredibly effective recipes for transforming your business data into exciting dashboards with SAP BusinessObjects Dashboards 4.0 Xcelsius Key Features Learn valuable Dashboard Design best practices and tips through easy to follow recipes Become skilled in using and configuring all Dashboard Design components Learn how to apply Dynamic Visibility to enhance your dashboards Get introduced to the most important add-ons available for Dashboard Design with the most up to date information for Dashboards 4.0 Book Description Xcelsius 2008 was recently included in SAP's BusinessObjects 4.0 family, rebranding "Xcelsius Enterprise" as "SAP BusinessObjects Dashboards 4.0". With features like flexible design and what-if scenarios, the powerful dashboarding software allows enterprises to make business decisions at a glance, and this book allows you to go far beyond the basics of these techniques. This cookbook full of practical and applicable recipes will enable you to use the full latest capabilities of Dashboard Design to visually transform your business data. A wide range of recipes will equip you with the knowledge and confidence to perform tasks like configuring charts, creating drill-downs, making component colors dynamic, using alerts in maps, building pop-up screens, setting up What-If scenarios, and many more. The recipes begin by covering best practices for using the Dashboard Design spreadsheet, the data-model, and the connection with the components on the canvas, later moving on to some from-the-trenches tricks for using Excel within Dashboard Design. The book then guides you through the exploration of various data visualization components and dashboard interactivity, as well as offering recipes on using alerts, dashboard connectivity, and making the most of the aesthetics of the dashboard. Finally, the recipes conclude by considering the most important add-ons available for Dashboard Design and enabling you to perform relevant and useful tasks straight away. What you will learn Become fully equipped with best practices for using the Dashboard Design spreadsheet Present data using the wide variety of data visualization components Learn how to make dashboard components interactive for an enhanced user experience Take advantage of Dynamic Visibility features on the dashboard Master manipulating the look and feel of your dashboards Gain confidence in using alerts on charts and other components Get to grips with advanced Dashboard Design components like the Trend Analyzer, Fisheye Picture Menu, History Component, and the Canvas Component Optimize the user experience of the dashboard Connect your dashboard to live data sources Export and publish the Dashboard Design model into several environments. Learn about the most applicable add-ons available for your dashboard requirements. Master setting up alerts on charts, gauges, maps and scorecards Who this book is for If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced Dashboard Design user, then this is the perfect book for you. You should have a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices, though experience of Dashboard Design as a specific dashboard tool is not essential.

**Technology Forecast** Eric Berg 2003-04 Technology Forecast: 20032005 is the latest in a series that the PricewaterhouseCoopers Global Technology Centre has published annually for more than a dozen years. This year's book provides in-depth coverage of enterprise applications and enabling software and forecasts significant developments in those areas over the next three years. It also contains information of particular interest to senior executives, including CFO Perspectives for each of the chapters and a chapter on business reporting and XBRL. As the pace of business quickens, companies must eliminate information lag and make more timely decisions. Business intelligence technologies, business activity monitoring, event notification, and digital dashboards provide executives with real-time information about the status of key business processes, including their relations with customers and suppliers. New business integration technologies, including increased use of XML-based Web services, are making end-to-end automation of

business processes easier to accomplish. Meanwhile, the incorporation of analytic capabilities into virtually all enterprise applications, as well as advances in knowledge management and collaborative technologies, increase the speed and effectiveness of decision-making. Technology Forecast: 20032005 discusses these and other changes under way in enterprise IT. It is divided into three sections, each highlighting a different area of enterprise software, that together comprise ten chapters providing detailed coverage of specific technologies and applications: Enterprise Applications contains chapters on enterprise suites, including enterprise suite architectures, supply chain event and performance management, and enterprise resource planning; customer-facing applications; and business intelligence and enterprise analytics, including real-time business intelligence and business activity monitoring. Information Management comprises chapters on enterprise content management; knowledge management and e-learning; and collaborative technologies. Enabling Software includes chapters on XML and Web services; component frameworks, including J2EE and Microsoft .Net; application and portal servers; and business integration technologies, including business process modeling, monitoring, and management. In addition, the book features interviews with three leading figures in IT: Vivek Ranadivé Founder, chairman and CEO of TIBCO Software. A recognized industry leader, Ranadivé was selected by InfoWorld as one of the top ten technology innovators in 2002. He was also recognized by Ernst & Young as a 2002 software entrepreneur of the year. His book *The Power of Now: How Winning Companies Sense and Respond to Change Using Real-Time Technology* (McGraw-Hill, 1999) has been widely used as a business school textbook. Tony Scott CTO for General Motors Information Systems and Services organization, where he is responsible for defining the enterprise architecture and standards across all of GM's global business. His work at GM has included the development of its employee portal and wireless strategy, and he directs the company's involvement in IT standards bodies and technology consortium organizations. Ronald Weissman A venture partner with Apax Partners, a leading international private equity and venture capital firm with offices throughout Europe, the United States, Israel, and Japan. Apax manages more than \$12 billion on behalf of major institutional investors in the United States and abroad. His focus is on U.S. and international opportunities in enterprise and infrastructure software and on Apax portfolio company development.
