**Cat** Fred Bohensky 2004-02-29 The Bohensky  
Dissection Series has been used successfully by  
more than 300,000 biology students nationwide.  
Each book in the series is designed to guide the  
student through the study of anatomical  
structures. The books do this through the use of  
clearly marked photographs and illustrations.  
Accompanying text offers the student both easy-  
to-follow dissection instructions and factual  
information about the section under observation.  
At the end of each chapter there are tests which  
can be used for self-study or for grade course  
evaluation. Within the traditional dissection

portion of a biology course, many programs include the sheep heart, eye, and brain. Within many of these guides, the author has incorporated photographs of these structures to more closely follow standard course curriculum. The author also provides important information on human organs such as the eye, ear, and heart. In this way, the student can better understand the role and function of these organs as they relate to human life processes. Add to this each book's large-size format, lay-flat spiral binding, and reasonable cost, and you can see why the Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country's schools.

**Dissertation Abstracts International** 1980

*CD Review Digest* 1991 The guide to English language reviews of all music recorded on compact discs.

**A Laboratory Guide for the Dissection of the Cat** Frederic Poole Gorham 1901
