Introduction to Managerial Accounting

Peter C. Brewer 2006 Introduction to Managerial Accounting, 3/e by

Brewer/Garrison/Noreen is based on the market-leading text, *Managerial Accounting*, by Garrison, Noreen and Brewer. However, this is not simply a briefer book with chapters removed; B/G/N has been rethought and retooled to meet the needs of the market. B/G/N 3/e is a more accessible, yet thoroughly student-friendly text that satisfies the basic needs of the managerial accounting student without unnecessary depth on advanced topics associated with the follow-up course, cost accounting/cost management. Faculty and students alike will find this new edition has retained the hallmark features of the Garrison brand: author-written supplements, excellent readability, terrific examples, and balanced end-of-chapter material.

Managerial Accounting Jerry J. Weygandt

2009-10-19 Many corporate managers struggle to see the relevance of accounting in their everyday responsibilities. Weygandt shows them how managerial accounting information fits in the larger context of business so they are better able to understand the important concepts. The new Do It! feature reinforces the basics by providing quick-hitting examples of brief exercises. The chapters also incorporate the All About You (AAY) feature as well as the Accounting Across the Organization (AAO) boxes that highlight the impact of accounting concepts. With these features, readers will have numerous opportunities to think about what they have just read and then apply that knowledge to sample problems.

Managerial Accounting Michael W. Maher 2001 This classic text for MBA programs offers balanced coverage of concepts, methods, and uses of managerial accounting with an increasingly strong emphasis on strategic management issues. This approach helps to focus on concepts and managerial uses of financial information rather than techniques of cost accounting. The Seventh Edition emphasizes strategic management decisions, increased coverage of process improvement, integration of financial reporting issues for management decision making, and application of managerial accounting tools to emerging areas like e-commerce, service sector, government, and nonprofits in examples and problem material.

Sg Cost Accounting Hansen 2002-05
Managerial Accounting Steve Jackson 2003 This text is unique in its first-person, discovery learning approach using a 4-step decision-making model throughout. It truly conveys a management perspective, by including coverage of topics such as ABM, the value chain and balanced scorecard evaluation techniques. It is also the first managerial text to incorporate coverage on knowledge management (Ch. 13) highlighting the latest developments for improved managerial decision making.
