The colorful student text presents concepts with numerous examples and step-by-step explanations. At the end of each exercise set is a systematic cumulative review.

Just as model cars represent key features of real cars, geometry represents key features of God's creation. Model cars represent the shape and scale of real cars even

though they are too small to be used for transportation.

Likewise geometry shows the relationships among measurements such as lengths and areas as well as the reasons for such relationships.

Thus geometry is a mathematical model. -

Key to Geometry, Book 7: Perpendiculars and Parallels, Chords and Tangents, Circles 2012-09-01

Key to Geometry introduces students to a wide range of geometric discoveries as they do step-by-step constructions. Using only a pencil, compass, and straightedge, students begin by drawing lines, bisecting angles, and reproducing segments. Later they do sophisticated constructions involving over a dozen steps. When they finish, students will have been introduced to 134 geometric terms and will be ready to tackle formal proofs.
