ATTRACTION Penny Reid 2015-04-09 From the New York Times Bestselling Author Penny Reid One week. Private beach. Invisible girl. Jerk-faced bully. What's the worst that could happen? Kaitlyn Parker has no problem being the invisible girl, which is why she finds herself hiding in various cabinets and closets all over her college campus. Despite her best efforts, she can't escape the notice of Martin Sandeke—bad boy, jerkface bully, and the universe's hottest, wealthiest, and most unobtainable bachelor—who also happens to be Kaitlyn's chemistry lab partner. Kaitlyn might be the only girl who isn't interested in exploiting his stunning rower's build, chiseled features, and family's billionaire fortune. Kaitlyn wants Martin for his brain, specifically to tabulate findings of trace elements in surface water. When Kaitlyn saves Martin from a nefarious plot, Martin uses the opportunity to push Kaitlyn out of her comfort zone: spring break, one week, house parties, bathing suits, and suntan lotion. Can she overcome her aversion to being noticed? Will he be able to grow beyond his self-centered nature? Or, despite their obvious chemistry, will Martin be the one to drive Kaitlyn into the science cabinet of obscurity for good? 'ATTRACTION' is book #1 in the Elements of Chemistry Series; it is 45k words; and it ends with a cliffhanger.

Apart from the procedures described, the large amount of physical data about listed chemicals is essential. This fully updated, revised and expanded new edition includes the purification of many new substances that have been available commercially since 2017, along with previously available substances which have found new applications. - Features empirical formulae and formula weights for every entry - References all important applications of each substance - Includes updated CAS registry numbers - Covers the latest commercial chemical products, including pharmaceutical chemicals and safety/hazard materials - Provides expanded coverage of laboratory/work practices and purification methods
