General Chemistry Workbook Daniel C. Tofan
2010-07-28 This workbook is a comprehensive collection of solved exercises and problems typical to AP, introductory, and general chemistry courses, as well as blank worksheets containing further practice problems and questions. It contains a total of 197 learning objectives, grouped in 28 lessons, and covering the vast majority of the types of problems that a student will encounter in a typical one-year chemistry course. It also contains a fully solved, 50-question practice test, which gives students a good idea of what they might expect on an actual final exam covering the entire material.

Deciphering the Chemical Code N. D. Epiotis
1996 This groundbreaking work, the culmination of more than 10 years of research, presents a

breakthrough theory of chemical bonding across the periodic table. Professor Epiotis, an internationally known and respected member of the theoretical community, challenges the conventional chemical concepts that underlie popular theories of chemical bonding. Building on his insight that electron-electron repulsion is the single crucial variable that differentiates one chemical system from another, the author formulates, explains, and applies a new approach based on nonorthogonal valence bond methodology that amounts to nothing less than a revolutionary unified theory of chemical bonding across the periodic table. This work represents the first post-Pauling theory of chemical bonding. New theory means new formulae, and this work is about new chemical formulae that lead to the self-consistent rationalization of

existing facts and, even more important, the design of new chemistry.

Chemistry Homework Frank Schaffer Publications 1996-03 Includes the periodic table, writing formulas, balancing equations, stoichiometry problems, and more.

Sat Subject Test - Chemistry Kevin R. Reel 2006-07-10 Contains SAT test preparation for the subject of chemistry and offers six full-length practice tests along with a chemistry review on all topics. Also provides two full-length practice tests on a CD-ROM which are time and scored and includes explanations.
