Making Cultures of Solidarity Diarmaid Kelliher
2021-05-10 This book combines radical history,
critical geography, and political theory in an
innovative history of the solidarity campaign in
London during the 1984-5 miners' strike.
Thousands of people collected food and money,
joined picket lines and demonstrations,
organised meetings, travelled to mining areas,
and hosted coalfield activists in their homes
during the strike. The support campaign
encompassed longstanding elements of the
British labour movement as well as
autonomously organised Black, lesbian and gay,
and feminist support groups. This book shows
how the solidarity of 1984-5 was rooted in the
development of mutual relationships of support
between the coalfields and the capital since the
late 1960s. It argues that a culture of solidarity
was developed through industrial and political
struggles that brought together diverse activists
from mining communities and London. The book
also takes the story forward, exploring the
aftermath of the miners' strike and the complex
legacies of the support movement up to the
present day. This rich history provides a
compelling example of how solidarity can cross
geographical and social boundaries. This book is
essential reading for students, scholars, and
activists with an interest in left-wing politics and
history.

Rhetorics for Community Action Phyllis
Mentzell Ryder 2012-07-10 Rhetorics for
Community Action: Public Writing and Writing
Publics, by Phyllis Mentzell Ryder, offers theory
and pedagogy to introduce public writing as a
complex political and creative action. To write
public texts, we have to invent the public we
wish to address. Such invention is a complex
task, with many components to consider:
exigency that brings people together; a sense of
agency and capacity; a sense of how the world is
and what it can become. All these components
constantly compete against texts that put
forward other public ideals-opposing ideas about
who really has power and who really can create
change. Teachers of public writing must adopt a
generous response to those who venture into
this arena. Some scholars believe that to prepare
students for public life, university classes should
partner with grassroots community
organizations, rather than nonprofits that serve
food or tutor students. They worry that a
service-related focus will create more passive
citizens who do not rally and resist or grab the
attention of government leaders or corporations.
With carefully contextualized study of an after-
school arts program, an area soup kitchen, and
parks organizations, among others, Ryder shows
that many so-called "service" organizations are
not passive places at all, and she argues that the
main challenge of public work is precisely that it
has to take place among all of these compelling
definitions of democracy. Ryder proposes
teaching public writing by partnering with
multiple community nonprofits. She develops a
framework to help students analyze how their
community partners inspire people to action,
and offers a course design that support them as
they convey those public ideals in community

texts. But composing public texts is only part of the challenge. Traditional newspapers and magazines, through their business models and writing styles, reinforce a dominant role for citizens as thinking and reading, but not necessarily acting. This civic role is also professed

The Rules of Competition in the European Economic Community R. Graupner 2012-12-06

The creation of the European Economic Community and the gradual achievement of a Common Market in connection with this Community raises not only economic but numerous legal problems as well. In fact, the Treaty of Rome and the various regulations, directives and decisions enacted for its implementation are bringing into being a new legal system which has a great influence not only within the frontiers of the Community but also on all European States which are in economic contact with the Community and indeed on the entire world. This applies particularly to the provisions on the laws of competition laid down by the Treaty and its implementing regulations. These provisions must be known and taken into consideration not only by Common Market enterprises but also by large firms outside the Community. The very comprehensive literature on the European Economic Community has therefore laid special stress on this subject. The large number of commentaries published in the various languages of the Community on the Rules of Competition indicates the great interest taken not only by the commercial world but also by the world of jurisprudence.

Vulnerable Children Deborah J. Johnson 2014-07-08 They are laborers, soldiers, refugees, and orphans. In areas of the world torn by poverty, disease, and war, millions of children are invisible victims, deprived of home, family, and basic human rights. Their chances for a stable adult life are extremely slim. The powerful interdisciplinary volume *Vulnerable Children* brings a global child-rights perspective to the lives of indigenous, refugee, and minority children in and from crisis-prone regions. Focusing on self-determination, education, security, health, and related issues, an international panel of scholars examines the structural and political sources of children's

vulnerabilities and their effects on development. The book analyzes intervention programs currently in place and identifies challenges that must be met at both the community and larger policy levels. These chapters also go a long way to explain the often-blurred line between vulnerability and resilience. Included in the coverage: Dilemmas of rights-based approaches to child well-being in an African cultural context. Poverty and minority children's education in the U.S.: case study of a Sudanese refugee family. The heterogeneity of young children's experiences in Kenya and Brazil. A world tour of interventions for children of a parent with a psychiatric illness. An exploration of fosterage of Owambo orphans in Namibia. UNICEF in Colombia: defending and nurturing childhood in media, public, and policy discourses. *Vulnerable Children* is a must-have volume for researchers, graduate students, and clinicians/professionals/practitioners across a range of fields, including child and school psychology, social work, maternal and child health, developmental psychology, anthropology, sociology, social policy, and public health.

The Global Community Yearbook of International Law and Jurisprudence 2019

Giuliana Ziccardi Capaldo 2020-08-20 The *Global Community Yearbook* is a one-stop resource for all researchers studying international law generally or international tribunals specifically. The Yearbook has established itself as an authoritative source of reference on global legal issues and international jurisprudence. It includes analysis of the most significant global trends in a way that allows readers to monitor the development of the global legal order from several perspectives. The *Global Community Yearbook* publishes annually in a volume of carefully chosen primary source material and corresponding expert commentary. The general editor, Professor Giuliana Ziccardi Capaldo, employs her vast expertise in international law to select excerpts from important court opinions and to choose experts from around the world to contribute essay-guides, which illuminate those

cases. Although the main focus is recent case law from the major international tribunals and regional courts, the first four parts of each year's edition features expert articles by renowned scholars who address broader themes in current and future developments in international law and global policy, themes that appear throughout the case law of the many courts covered by the series as a whole. The Global Community Yearbook has thus become not just an indispensable window to recent jurisprudence: the series now also serves to prepare researchers for the issues facing emerging global law. The 2019 edition both updates readers on the important work of long-standing international tribunals and introduces readers to more novel topics in international law. The Yearbook continues to provide expert coverage of the Court of Justice of the European Union and diverse tribunals from the International Court of Justice (ICJ) to criminal tribunals such as the International Criminal Court (ICC) and the International Residual Mechanism for Criminal Tribunals (MICT), to economically based tribunals such as ICSID and the WTO Dispute Resolution panel. This edition contains original research articles on the development and analysis of the concept of global law and the views of the global law theorists such as: a judicial knowledge sharing process as a tool for courts working together in a universal constitutional structure; the role of human rights treaty monitoring bodies in the international legal order; and an examination of the consequences of the UN compact for the safe, orderly and regular migration on international law. The Yearbook provides students, scholars, and practitioners alike a valuable combination of expert discussion and direct quotes from the court opinions to which that discussion relates, as well as an annual overview of the process of cross-fertilization between international courts and tribunals. The Yearbook provides students, scholars, and practitioners alike a valuable combination of expert discussion and direct quotes from the court opinions to which that discussion relates, as well as an annual overview of the process of cross-fertilization between international courts and tribunals and a section focusing on the thought of leading international law scholars on

the subject of the globalization. This publication can also be purchased on a standing order basis.
