*Teaching, Learning and Investigating Pragmatics* Sara Gesuato 2015-09-18 This volume presents a collection of research papers investigating how to foster the learning and teaching of pragmatic phenomena, as well as how to administer tests that assess pragmatic competence in second/foreign language education with regards to several target languages. The topics investigated include: speech acts; computer-mediated communication; conversation analysis; pragmatic, intercultural, and emotional competence; native and non-native performance; data collection and instructional methods; needs analysis; and syllabus design and materials development. The contributions will be of particular interest to linguists, language learners and teachers, teacher trainers, and communication experts.

Recent Issues in Pattern Analysis and Recognition Virginio Cantoni 1989-12-20 This book offers readers a broad view of research in some Western and Eastern European countries on pattern and signal analysis, and on coding, handling and measurement of images. It is a selection of refereed papers from two sources: first, a satellite conference within the biannual International Conference on Pattern Recognition held in Rome, November 14-17, 1988, and second, work done at the International Basic Laboratory on Image Processing and Computer Graphics, Berlin, GDR. The papers are grouped into three sections. The first section contains new proposals for the specific computation of particular features of digital images and the second section is devoted to the introduction and

testing of general approaches to the solution of problems met in digital geometry, image coding, feature extraction and object classification. The third section illustrates some recent practical results obtained on real images specifically in character and speech recognition as well as in biomedicine. All the techniques illustrated in this book will find direct application in the near future. This book should interest and stimulate the reader, provoke new thoughts and encourage further research in this widely appealing field.
